Sentinel Hill Items

Mrs. H. Limpert has returned from Vancouver, where she has been holidaying during the past four months.

Messrs. R. Sloan and Stanley Wiley have also returned from Vancouver. Mr. Sloan is again taking charge of his farm in the Newgate district.

Miss Anne Sledd, of Collingwood, Ont. has been the guest of her Uncle and Aunt, Mr. and Mrs. Geo. E. Hewson, during the Easter vacation.

The Misses K. and E. Newman have returned to their respective schools for the remainder of the year.

Miss Nancy J. Chase visited with her little friends, Misses Joan and Vivian Harrison, during the Easter vacation.

Mrs. A. E. Chase and children, of Delia, were the guests of Mr. and Mrs. Wm. Adams last week.

Mr. J. C. Hewson returned to Cross field to his teaching duties, after the Easter vacation.

Miss Cousins, of Irvine, Alberta, visited with her friend, Mrs. V. J. MacNair, during Easter week.

Young Orators Enter Final Contest

Gwen Gaul, aged 17, of Grande Prairie, and Walter MacDonald, age 18, of Red Deer were selected as the winners for Northern Alberta and Southern Alberta respectively in the finals of the Alberta division of the Canadian and International Oratorical contest on Thursday night. These two winners will later contend for the privilege of representing Alberta in the Dominion finals to be held at Toronto, following which the Canadian champion will compete for International honors at Washington.

Faith must rest on evidence—the evidence of God's Word.

Cards of Thanks

I wish to thank the Majestic and Farrell Lake Women's Institute for the book sent me during my recent illness.

ORVAL R. HANDS

We desire to express our sincere thanks and appreciation to the many kind neighbors and friends for their sympathy and floral tributes during our recent sad bereavement.

MR. & MRS. JOHN MARSHALL
MR. & MRS. JOE MARSHALL
MR. & MRS. DAN MAR-HALL
AND FAMILY

Mr. and Mrs. A. Glob, and Mr. Arthur Williams, wish to express their sincere thanks for all kindness shown to their brother, P. M. Williams, during his recent illness; also for the beautiful flowers sent as expressions of sympathy in our bereavement.

Will Bridge Many Northern Streams

Two steel bridges and thirty of wooden construction will be erected in the southern part of the Peace River district during the coming season as part of the provincial government's road building program. One of the proposed steel bridges will span the Beaverlodge River near the new town of Beaverlodge, while the other will cross the Spirit River near Rycroft, and many of the smaller bridges to be constructed will bring prosperous agricultural districts closer to railway transportation.

Announcement!

THIS IS TO INFORM THE INHABITANTS of Delia and District that Messrs. Grant-McLean Co., Ltd. (successors to R. A. Stewart), will continue to act as our Agents, and that all orders can be left in their charge, with the assurance that they will receive our prompt, personal, and careful attention.

DELIA BRANCH OF THE CANADIAN LEGION

On Saturday evening last the local branch of the Canadian Legion held their regular monthly meeting in Costes' Hall, when a good turnout of comrades and others were present to do honor to the retiring president, Com. George Martin, who is shortly leaving Delia for Monitor, being promoted by the Bank of Commerce.

The secretary, Com. E. H. Gallagher, read the minutes of the previous meeting, which were confirmed.

After some routine business had been disposed of, the important business to come before the meeting was the election of a new president, and the presenting to the retiring president of a small token of the respect and esteem in which he is held, and to take cognizance of the indefatigable way in which he has worked for the Legion during the time he has been in office.

After various nominees had been proposed Dr. F. J. Netherton, consented to accept the presidency for the ensuing term, and was called upon to occupy the chair, then vacated by Com. G. Martin.

Com. Netherton thanked the members for the honor of electing him president of the local legion, and said that with their co-operation he would endeavor to carry out the duties to the best of his ability, and to the satisfaction of all. He then said he had a pleasing duty to perform, and that was the presenting to the retiring president, on behalf of the members, a slight token of the respect and esteem in which he was held, and for the untiring manner he had at all times worked for the good of the Legion. He called upon Com. (Major) J. L. Newman to make the presentation.

Com. Newman said he had great pleasure in handing Com. Martin that Smoker's Set, and regretted that he was severing his connection with them. He had ever worked for the good of the Legion, and hop ed he would look upon that small token, not for its intrinsic value alone, but the many friends he had made here in Delia. He wished Com. and Mrs Martin and family every success in the future, long life and much happiness.

Com Martin replied at some length, and thanked the members for their splendid gift. It was indeed a surprise, because anything he had done for the Delia local, was for the good of the Legion generally. He outlined the growth of this local from a membership of twenty, till now over sixty or more. They were in a flourishing condition, and it was intended in the near future to build a suitable hall for the membership. He was going away, but he hoped to be able to pay them a visit sometime.

Refreshments consisting of tea, coffee, cake, sandwiches, etc., were then served, when ultimately the proceedings came to a close.

OBITUARY

PERCY MONTFORD WILLIAMS

It is with sincere regret we have to record the death of this well-known and much respected gentleman, which occurred here at his residence on Thursday morning last, 4th inst. The deceased first became ill early in February last, and gradually got worse, when he was taken by Dr. MacDonald to Calgary, where he had been a patient at the Holy Cross Hospital for only two or three weeks. At first he tried to shake his illness off, and came out sooner than he should have done to resume his duties, with the result that he finally took to bed, with a trained nurse in attendance. He never really rallied, and developed a pronounced cough, with the result that his medical advisor urged him to go to the hospital. Seeing no hope was held out for his recovery they allowed him to come home, and death took place, as above stated.

Deceased was born in Toronto, and was 38 years of age. He has a brother, Mr Arthur Williams, of Toronto, who arrived for the funeral, and two sisters, Mrs. A. Glob, of Munson, and Mrs. H. Sinclair of Medicine. He first came to work here as a clerk at the Farmers' Store, and subsequently was employed by W. B. Dunlop, where he worked until the time of his illness. He was a member of Hand Hills Masonic Lodge.

The Funeral service was held in Delia United Church on Sunday afternoon, at 2 30, and was conducted by Rev. G. A. Steele, the pastor, and the Masonic Lodge, the brethren attending in a body. The church was filled to capacity.

The reverend gentleman preached an eloquent sermon, his theme being "Friendship;" also a text from the Proverbs, "There is a friend that sticketh closer than a brother." At the close he made a glowing tribute to the departed, saying he was upright, honest, assiduous to his duties, and much respected by everyone with whom he came in contact. As a singer he was a valuable gathering there that afternoon to pay their last respects to the memory of the deceased.

During the service the choir rendered the hymns, joined in by the large congregation—"O, what a friend we have in Jesus;" "Jesus, Saviour, pilot me;" and "Lead, Kindly Light!" Mr and Mrs A S. Newcombe sang very feelingly a duet, "Rock of Ages." Miss McDonald presided at the piano.

At the close Masonic chequies were conducted by the brethren, who also took charge at the graveside.

There were numerous floral tributes, sent by the following:—

The relatives, the Masonic Order, Mr. and Mrs Dunlop, the employees of the Farmers Store, Mr. and Mrs. Anton Anderson, Mr. and Mrs. G. A. Richardson, Mr. and Mrs. George Martin, G. E. Kennedy, Dr. F. J. Netherton, Mr. and Mrs. A. E. Thompson, Mr. and Mrs. Gillis, Jas Hamilton, and many others.

The pallbearers were—Messrs. W. B. Dunlop, Geo. Martin, Dr. Netherton, G. A. Richardson, A. E Thompson, and F. Anderson.

Winter Bros. Funeral Home, Drumheller, had charge of the funeral arrangements.

MARGARET MARSHALL

The death took place, on 5th inst., at the residence of her brother and sister-in-law, at the Hand Hills, of Margaret Marshall, aged 20 years, of spinal meningitis. Deceased had previously been ailing with influenza, but had only been confined to bed for a week, when the dread disease set in, and she passed away on Friday last, April 5th. The funeral was held on Saturday afternoon, to Delia Cemetery. Father Fay, of Hanna, conducted the funeral service. Much sympathy is felt for the bereaved family.

Governor General to Visit Province

His Excellency Lord Willingdon, Governor General of Canada, accompanied by Lady Willingdon will make a brief visit in Edmonton and Calgary during the coming week on his way to and from the International Convention of Education which he will attend at Victoria, B.C.

Better Seed, Larger Crops, Higher Profits

(By H. G. L. STRANGE, Fort, Alberta, President Canadian Seed Growers' Association).

The farming world of Canada this last year has been filled with discussions in regard to practically everything that enters into production, transportation, processing, and delivery of Canadian grains on the world's market.

One important factor has come out of it all, and is not disputed, which is that Canada is in serious danger of the loss of her hardly won reputation for hard red spring wheat.

There is no disputing that if this reputation were to be lost it would be a calamitouhs for the farmers of Canada, because it would mean at the outset that Canadian wheat would have to come into competition, on an equal basis, which is seldom had had to do up to the present, with the enormous quantities of hitherto regarded as inferior bread from other wheat-exporting countries. Most certainly this would mean not only lower prices but a higher marketing cost as well because it would be more difficult to sell due to less eager demand.

Apparently the wheat raisers of Canada for long have regarded themselves as occupying a preferred position and have really come seriously to think that the person who says their wheat should be sacrificed with regards to what the Canadian farmer wishes to sow to them with and should, in fact, regard himself as more or less of a lucky person to get this wheat at all.

This mental attitude on the part of the farmer is, of course, all wrong, and if continued will certainly lead to disaster. The unpleasant fact remains that the real master of the whole situation is the buyer and not the producer, and that if Canada wishes to remain as the supplier to the world's markets of the highest quality of wheat, that will fetch a premium above the wheats from all other countries, then it is vitally necessary for the wheat producers of Canada, through their marketing organizations and other agencies, to take considerable pains to find out exactly the kind of wheat their customers desire and exactly the grade and shape in which the customer desires this wheat to be delivered.

The world's buyers require only a maximum of some ten grades of Canadian wheat. The unpleasant fact remains that last year there were offered in Canadian wheat were offered by farmers to the marketing agencies for sale. Before could count with ten separate grades and varieties, it has been computed that no less than 2,623 grades could be produced. The great bulk of which grades are absolutely and entirely unnecessary and preventable.

Without recounting the many factors that go to make up all these unnecessary grades it is sufficient to state that a great number of them are caused by the mixing of different varieties. Therefore, no small number of this great mass of unnecessary grades can be eliminated by the farmer himself this coming year if he will determine to seed only seed that is pure clean, reasonably true to variety and the right variety for his district.

Not only will the crops produced from such seed mature more evenly than scrub seed, not only will they give a higher yield because of the careful selective breeding work behind them, but in addition they will give a higher grade because of the trueness to variety.

This last year, for instance, because of the frost, over half the crops of nearly all wheats excepting the early varieties. Yet it was noted by skilled professional observers that whenever good true-to-variety seeds had been seeded, particulary registered seed, even with the later varieties, that the resulting crop was much less harmed by frost and so commanded a much higher grade than average run of crops of the same variety.

The air is full of co-operation these days but the farmer must not forget that only a small step in co-operation has been accomplished by co-operating together to put in an agency to market crops. True co-operation means that the farmer himself is here will do everything within his power to co-operate, not only with his marketing agency, but also with the purchasers of his products. Both of these mean actually the same thing, producing as nearly as possible the kind of product the customer demands and in such shape as he requires.

As far as the wheat industry is concerned, this simply means that crops will be produced which are as clean as possible, and as true to variety as possible and of that variety which is most acceptable to the world's purchaser, which as far as the bulk of Alberta wheats is concerned means hard, red spring wheat, of high milling value.

To secure these kind of crops it is necessary for the first step to be one seed of the right variety and which will be as clean as it can be made, which will contain practically no weed seeds nor other kinds of grain, and which will be of strong vitality and germination.

If the bulk of western Canadian wheat growers would do this very simple thing there would never be the slightest danger of Canadian wheat losing the fine premium over all other wheats which it has enjoyed in the past and should command in the future. Incidentally, too, the work of those who market this wheat will be easier and carried on more cheaply.

There is no money spent by the farmer which will bring him in such big profits as that spent in securing good, clean seed.

Ford

Ford Sales—Ford Service

The Automobile Buying Public is daily becoming more motor-wise, and is now looking beneath the hood and under the chassis for hidden values, as well as being attracted by appearance.

When a thorough investigation of merit is made the FORD stands out as the greatest automobile value offered to-day.

The Public appreciates this to such an extent that retail deliveries of FORDS in the month of March exceeded, by 25 per cent, the deliveries during the peak of production of the model "T".

Buy your car where you can get the best value for your money, and where you can get local Dealer service behind it.

The West's Ocean Port

Announcement that the rails of the Hudson Bay Railway had reached Churchill on Good Friday, is the most welcome news the people of Western Canada have received for some time, heralding, as it did, the realization of a long entertained hope. For many years Western Canada agitated for the building of a railway to the Bay. It was vigorous, even violently, opposed by Eastern Canada interests, and, politically speaking, the voice of the West was weak in comparison to that of the East. The West, however, kept up its campaign of education as to the merits and feasibility of the route, and ultimately all political parties in Canada became committed to the project.

Finally, plans for a Hudson Bay Railway assumed definite shape in 1910, when a branch line of the Canadian Northern was completed from Hudson Bay Junction, Sask., to The Pas, Manitoba, and the building of a Government line from The Pas to Hudson Bay was authorized by Parliament. Work commenced the following year with Churchill as the objective.

Following a change of Administration at Ottawa, Churchill was abandoned as the proposed terminal, and Port Nelson chosen. The location of the railroad was accordingly altered. The right-of-way was cleared and graded to Port Nelson and steel laid, before the end of 1916, at Pas-Kettle Rapids, 332 miles from The Pas.

Owing to the war and consequent lack of men and steel, operations were suspended and for some years only part of the completed railway was kept in repair.

The work thus commenced by the Liberals in 1910 was continued by the Conservatives until war, and the after-war period of financial depression stopped the work. The work, however, was carried on intermittently, more or less half-hearted manner with the result that progress was slow, and the country, as a whole, lacked confidence in the undertaking, the East regarding as a waste of public money and in the nature of a political sop to the West.

With the acceptance by Hon. C. A. Dunning of the portfolio of railways in the Mackenzie King Government, a marked change took place. It is an open secret that Mr. Dunning made the acceptance of the portfolio dependent upon the condition of his entry into the Government. He frankly told the people of the West that he regarded it as "his job" to complete the railway in the shortest possible time.

The task of reconditioning the roadbed which had fallen into disrepair was begun, and, in view of divergent views which prevailed as to the relative merits of Churchill and Nelson as terminal harbors, Mr. Dunning secured the services of the most competent British harbor engineer to decide the question. He reported strongly in favor of Churchill, and his report was immediately accepted, and the road again diverted in that direction.

Since then there has been no let-up in construction. It has been pushed forward day and night, in season and out of season, with the gratifying result announced on Good Friday.

At the meantime Mr. Dunning grappled with the problem of building an effective harbor at Churchill and establishing the feasibility of the ocean route through Hudson Straits. Airplane and other surveys, radio, and every modern invention was called into use, and in two years public opinion in the West was not only justified, but the East was largely converted, especially as huge and very valuable mineral discoveries in the northland made more accessible by the railway quickly followed.

Although both steel and telegraph have reached Churchill it will require some months yet to fully ballast the road to make it capable of efficiently handling trains. There is an enormous amount of work to be done to build necessary harbor facilities at Churchill. That work is in progress and is being prosecuted with the same vigor as characterized the handling of the railway in the last three years. Hundreds of carloads of supplies, material and equipment for the harbor are even now distributed along the line. The railway is be rushed in at once and will be finished this year.

It is confidently anticipated that before the end of 1929 freight will be moving steadily from the prairies to the West's own ocean port on Churchill, and Mr. Dunning has already announced that the Crow's Nest Pass schedule of rates on grain will apply to the Hudson Bay route.

The new route will, it is believed, effect a veritable revolution in Western transportation. In preparation for it both of our great railway systems have been building north and south lines to connect with the new road, formerly their policy was to so construct lines as to move everything from east to west and west to east.

With the completion of the Hudson Bay Railway one of Canda's ambitions is being realized. It is in these Western Provinces that depth is to be given to the Dominion, something it has lacked since Confederation brought a Dominion into existence consisting of a long narrow strip extending from the Atlantic to the Pacific just north of the International boundary line.

The Up-Keep Of Roads

Well-constructed highways are necessary in Canada to meet the insistent demands of traffic, but well-maintained roads are even of more importance in the interest of economy. Consequently, provincial road administrative organs and engineers are devoting a great deal of thought and attention to the care and protection of roads. In 1927, the mileage of roads under maintenance in Canada under the patrol of gang system was 44,416 miles, at a cost of $16,624,617.

Development In Winnipeg

Within two years manufacturing and distributing firms with headquarters in Montreal and Toronto, will invest $10,000,000 in Winnipeg branch offices, factories and warehouses, is the opinion of J. M. Davidson, secretary of the Industrial Development Board, now back from an extended trip east.

King Received Many Images

The wonderful collection of religious as well as profane images sent to Buckingham Palace by well-wishers throughout the length of the Empire being treated with the greatest respect, and will be ticketed and placed in rows on shelves for the King and Queen's friends to see later. There are crucifixes in ivory, in gold, and in silver, sometimes jeweled, as well as tiny wooden ones. One Indian rajah sent a Buddha. Sacred relics are also to be found among this amazing collection.

Foreigners Led

Down in Cochrane, in the province of Ontario, where it is as good as one's life is worth to suggest that foreigners should be allowed to come to Canada, the high-school examination results showed that a Norwegian girl stood first, a Russian girl girl stood second, and a Finn girl stood third.

FLU Germs Breed In the Throat.

First Appear As A Common Cold, But Gain Tremendous Headway In Six Hours

SOME SIMPLE PRECAUTIONS AGAINST INFLUENZA

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of Influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerviline. Half a teaspoonful of Nerviline in water makes a most efficient gargle. The germ-killing properties of Nerviline quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure to rub the neck and chest with Nerviline. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding germs. This combination treatment of Nerviline and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

Big Amount For Research

Ontario Government Increasing the Contribution For This Purpose

In conformity with the Ontario Government's offer "dollar for dollar" plan of assistance for industrial research in the province of Ontario, a bill has been introduced in the Legislature increasing the contribution of the provincial government to the Ontario Industrial Research Foundation from $1,000,000, as provided in the 1928 act, to $2,500,000.

Last year legislation was provided for the subscribing by the Ontario government of $1,000,000 if the same amount were subscribed by private interests. So enthusiastic was the response that the amount has been over-subscribed and this amendment provides for its increase to $2,500,000, to be granted on the same terms.

A TIRED FEELING IN SPRINGTIME

Not Sick, But Not Up To the Mark—You Need the Help Of That Sterling Tonic, Dr. Williams' Pink Pills—They Give New Vitality.

With the passing of winter many people feel weak, languid and easily tired. The body lacks the vital force and energy pure blood alone can give. In a word, while not actually sick, the indoor life of winter has left the system in need of a blood-building, nerve-restoring tonic is needed to give renewed health and vitality. Dr. Williams' Pink Pills are an all-round blood builder and nerve tonic, especially suited to this time of spring. Every dose helps to make richer, redder blood and with this new blood returning strength, cheerfulness and good health quickly follow.

If you are pale, easily tired, or troubled by any other exertion, if your complexion is poor or you are troubled with pimples or eruptions, Dr. Williams' Pink Pills are just what you need to put you right. If you are troubled by dizziness, are subject to headaches and backaches, if you are irritable and nervous, if your sleep does not refresh you, or your appetite fails, you need the treatment Dr. Williams' Pink Pills alone can give—you need the new blood this tonic medicine brings. Mr. A. Marcoux, North Hatley, Que., writes: "I have found great benefit from the use of Dr. Williams' Pink Pills. Before I began using them I was in a badly run-down condition, and at times felt scarcely able to work. Dr. Williams' Pink Pills have changed all this and I am taking them and enjoying the best of health. Every one who is run-down and easily tired should give this great medicine a fair trial."

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, indigestion or nervousness. Take them as a tonic if you are not in the best physical condition and sufferings or resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50c. a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Deaf and Dumb Institute

Saskatchewan Committee Is Receiving Data For New Institution

Investigation of various schools for the deaf and dumb in Canada and the United States, with a view to furnishing data that will be useful in connection with the establishment of such an institution in Saskatchewan, is being undertaken by a committee which left Regina, recently, for Winnipeg and points east.

The main objective of the committee appointed by the Saskatchewan government is to determine just how much agriculture it would be advisable to have taught in a school for the deaf and dumb, and how much vocational training is desirable.

Members of the committee are Mrs. George Hollis, Shaunavon, past president of the women's auxiliary of the United Farmers of Canada; Nelson Latour, school district organizer in the Department of Education; and J. D. Williams, Saskatoon, vice-president of the Western Canada Association for the Deaf, and M. W. Sharon, provincial architect.

Use Minard's Liniment for the Flu.

Gold Fish Not So Delicate

Only temporary suspension of the activities of a bowl of gold fish resulted when the temperature dropped to 14 degrees above zero and the fish were encased in a solid cake of ice. They resumed their activity when the ice thawed. The temperature was the lowest in Marshfield at any time in the last twenty-five years.

Average Farm Wages

According to a statement issued by the Department of Trade and Commerce of the Dominion Government, the average farm wages paid in Alberta were $72 per month, which is the second highest average in Western Canada, British Columbia being rated at $77 per month.

Edmonton's School Enrollment

Edmonton's school enrollment is 14,000, which is more than double the city's entire population twenty-five years ago.

In England nearly 5,000,000 items of correspondence for places abroad are posted annually with insufficient postage and over $200,000 a year is collected in surcharges from the addressees.

Armament Reduction

Great Britain Is Leading the World In This Connection

Right Hon. W. C. Bridgeman's speech of the other day, to which we have already referred, was noteworthy, among other things, for how it indicates how the cost of British naval maintenance is being lessened. Before the War, the First Lord of the Admiralty pointed out, Britain had 114 cruisers. Today she has only 52. Before the War the naval estimates amounted to 24.5 per cent. of the entire national budget. Today they are only 6.9 per cent.

Facts and figures like these speak for themselves. They cannot be given any meaning other than that which they obviously bear. Anglophobes in the United States will probably find them a bitter pill to swallow. But fair-minded Americans will see in them one of the real causes behind the present tension that is building for war with an eye on imminent hostilities, would not do. Britain has done. Britain leads the world today in the matter of naval disarmament, as she has always done.—Regina Leader.

Utilizing Waste Gas

British Capital Becomes Interested In Turner Valley Field

According to Premier Brownlee, the proposed undertaking of large British capital in utilizing waste gas in the Turner Valley field goes far beyond any carbon black plant and involves one of the biggest organizations in Canada. The first objective is to break into its constituent parts the waste gas in the Turner Valley field, and from that to engage in certain chemical manufacturing industries. The entire resources of the Alberta University chemical research department are placed at the disposal of the concern by the Government for research purposes.

From the Montana border to the Fort Normandeau district survey work will shortly be in progress, and in the extension programme, involving millions of dollars, Southern Alberta will figure largely. The bringing in of producing wells in rapid succession in the Turner Valley and the report that Home Oil will start paying dividends shortly, have focussed national attention on Alberta oil.

Peace River Country

Comprehensive Plans For Bringing Out British Settlers

Major-General W. A. Griesbach, member of the Canadian Senate and prominent Edmonton barrister, stated that he had made definite proposals to prominent men in the City of London, England, for the settlement on the Peace River country of a large number of settlers, principally designed for the Peace River country. He has been busy, he said, with the reported scheme for settling millions of acres in that area. He described the latter plan as fantastical. He has met the prominent representative men with whom he was in touch were giving the matter serious consideration.

Live Stock Held By Indians

Holdings of farm live stock by Indians in the reserves in Alberta during 1928 were as follows: horses, 36,172; milch cows, 6,184; other cattle, 34,495; sheep, 3,204; swine, 9,704; hens and chickens, 108,918; turkeys, 7,715; geese, 5,196; ducks, 7,788.

Hungarian Beggars Taxed

Beggars must pay taxes on their incomes, the Hungarian Government has ruled, following an investigation which proved that beggars often made more money than working men. An organization of mendicants has been ordered disbanded.

MOTHER OF TWINS HELPED

Restored to Health by Taking Lydia E. Pinkham's Vegetable Compound

Mitchell, Ont.—"I had little twin babies and for quite a while after I was so weak I could not do my work because of pains in my back and legs at the back. I took Lydia E. Pinkham's Vegetable Compound, and after I was able to get up and do my work. I have taken three bottles and I am fine, do my work without trouble and am gaining in weight and strength. I will gladly recommend the Vegetable Compound to anyone."—Mrs. F. STATTON, Box 220, Mitchell, Ont.

W. N. U. 1780

For Trans-Siberian Railway

Heavy Shipment Of Railway Material To Leave Vancouver For Russia

Thirty thousand tons of railway material—trucks and steel framing for box cars—will shortly leave Vancouver for the Orient, as equipment for the Trans-Siberian Railway. The order for this material was placed thirteen years ago, but delivery was halted with the outbreak of the Russian Revolution, and the equipment laid in the Canadian Pacific Railway's yards, at Coquitlam, until conditions for delivery were favorable.

Sore Corns Drop Off If You USE "Putnam's"

When you notice any sign of callous on the foot or toes—that's the time to paint on a few drops of PUTNAM'S CORN EXTRACTOR and the pain will prevent more. No matter if the corn is hard or soft. Let it be deep or between the toes. Putnam's will remove it without pain. Paint on PUTNAM'S CORN EXTRACTOR. It does the work—and roots out the corn, quickly and without pain.

Pensions Act Modified

Amendments Will Make It Easier For Alberta Cities

Amendments to the Old Age Pensions Act, passed before the legislature prorogued, will bring some relief to the cities in connection with the fear that a great number of the old age pensioners will drift from the rural municipalities into the cities.

An amendment to section four provides that any person having been granted a pension whilst resident in a municipality, on the improvement district, shall be deemed to continue to be a resident of that district so long as he continues to receive the pension. This is in line with the suggestion of G. H. Webster, Liberal, Calgary.

In connection with the maintenance fund, an amendment was passed providing that no person will be called upon to supply maintenance if in the doctor's opinion it is not only good for the children when taken with cod liver oil and iron, but for the mixture who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the home.

Motorist (after knocking over a butcher's boy): "Are you hurt, my boy?"

Butcher's Boy (picking up contents of his basket): "Dunno, here's me liver and ribs, but where's me kidneys?"

YOU CAN'T DYE with Good Intentions

You can get results—after a fashion—with any old dye but to do work you are proud of take real colours That's why we put them in Diamond Dyes. They contain from three to five times more than other dyes on the market. Cost more to make? Surely. But you get them for the same price as other dyes.

Next time you want to dye, try them. See how easy it is to use them. Then compare the results. Note the absence of that re-dyed look; of streaking or spotting. See that the colour is true to the life out of the cloth. Observe how the colors keep their brilliance through repeated washings. Your good sense will refund your money if you don't agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The *blue package* is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. Remember this when you buy. The *blue package* dyes silk or wool only. The *white package* will dye every kind of goods, including silk and wool. Your dealer has both packages.

Heavy Shipment Of Railway Material To Leave Vancouver For Russia

Thirty thousand tons of railway material—trucks and steel framing for box cars—will shortly leave Vancouver for the Orient, as equipment for the Trans-Siberian Railway. The order for this material was placed thirteen years ago, but delivery was halted with the outbreak of the Russian Revolution, and the equipment laid in the Canadian Pacific Railway's yards, at Coquitlam, until conditions for delivery were favorable.

Canada's Mineral Industry

Third In Importance Among the Primary Industries Of the Dominions

Addressing the 30th annual meeting of the Canadian Institute of Mining and Metallurgy in Winnipeg, S. J. Cook, chief of the mining, metallurgical and chemical branch of the Dominion Bureau of Statistics, said that, "Canada's mineral industry, third in importance among the primary industries of the Dominion, brings to the nation a prestige far beyond the monetary measure of the output. First in nickel, first in asbestos, third in gold, third in silver, fourth in lead and copper, and sixth in zinc, among the world's producers, Canada enjoys an enviable position in the mining world with every prospect favorable to continued expansion."

Test Alberta Coal

Samples Are Taken To England For Laboratory Test

Tests of Alberta coal with a view to the securing of a substitute for anthracite will be made at the Woodall Duckham laboratories in England, so Sir Arthur Duckham announced on route east. He obtained samples for this purpose. He is on his way home from Australia, which he visited on an Empire trade mission.

The Oil For the Farmer.—A bottle of Dr. Thomas' Eclectric Oil in the farm house will save many a dollar during the year. It is not only good for the children when taken with cod liver oil and iron, but for the mixture who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the home.

Battle Won By Music

Spaniards Were Routed In 1633 By Clever Ruse

When in 1633 Count William of Nassau was at war against the Spaniards, and had won the Philippine line in Flanders, he soon saw that the Spaniards would do everything to get it back again. As he could not get any reinforcements soon enough to help him, he tried to deceive the enemy. He therefore sent for sixty empty ships and on each of them, besides the necessary crews, one musician. When evening came these ships sailed out and, arriving near the threatened line the musicians started playing different marches, some the Scottish, others the French, and again, others the German march. This made a tremendous noise which caused the Spaniards to think that the Dutch had received reinforcements. They therefore went quickly on the run, and Count William saved the Philippine line from the enemy without shedding a single drop of blood.

Manitoba Taking Her Place

Manitoba is now experiencing a period of intensive mining development. Copper, gold, silver, lead, zinc and other metallic products have been mined, and exceptional opportunities exist for the prospector and mining company.

Airplanes For North

Announcement is made that Northern Aerial Mineral Exploration Limited, will bring three big machines to Edmonton. These are to be used in exploring the region north, north-east and north-west of Alberta.

A house built of cellular glass, held together by thin iron plates, has been constructed in Japan by a native scientist. There are no windows; illumination is provided by valves on the second floor.

The custom of a woman wearing a wedding ring originated in Egypt.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheets, ask for Appleford's "Centre Pull" Packs.

Western Representatives:

HUNTER-MARTIN & CO., REGINA, SASK.

Divorces Granted In Foreign Countries May Not Hold Good Here

Ottawa.—The decision of the Quebec courts that divorces granted in a foreign country cannot be recognized in that province and that people who have been married in Quebec, divorced outside of the Empire and remarried are guilty of bigamy, has caused grave anxiety at Ottawa as to the position of hundreds of persons twice married, who live in the other provinces.

The legal position is in some doubt and it is not improbable that a test case will be made to determine the status of re-married persons in the other provinces.

The law officers of the Crown have declined to comment on the situation, but it is pointed out by officials of the senate, who keep track of the divorces granted to Canadians both in Canada and elsewhere, that in Canada there were 1,483 divorces in the United States than in this Dominion. Of course this applies chiefly to Ontario, and in this regard it is interesting to know that while 200 divorces were granted by parliament to Ontario citizens last year, 548 divorces were granted to citizens of Ontario in Detroit.

The problem in the Western provinces is not quite the same since they have their own divorce courts. But it is pointed out that many westerners have gone to the United States for divorce because they could not meet the statutory conditions imposed by the Canadian laws. A considerable number of Manitobans obtained divorce last year in Minneapolis and St. Paul, and the supposition is that these people could not have got the statutory proof necessary to obtain a divorce in the Manitoba courts. Likewise the citizens of Saskatchewan, Alberta and British Columbia continue to go to the United States in large numbers for divorces.

If the interpretation placed upon divorce laws by the Quebec court applies in the West, then these people who have remarried have committed bigamy and are liable to prosecution and imprisonment.

The Earl Of Egmont

Finding It Somewhat Difficult To Become Adjusted To New Conditions

London, England.—"I have been here three weeks, but cannot make anyone out," the new Earl of Egmont, until recently plain Mr. Percival, an Alberta farmer, told the Daily Mail representative at the ancestral estate, Ringwood, Hampshire.

The villagers are trying to make out the new earl and wondering if he is going to settle down at Avon Castle. Meantime, the lads of the village are trying to get used to having the earl's heir, his son, Viscount Percival, play with them around the market square.

When questioned regarding the future, the earl said:

"I might live at Avon Castle for a time, but that means a lot of money for me. I am money going out on it all the time. A place like that is for a rich man. I may be able to sell the place and I may. I shall get a tutor for my son, and he is a bright boy and will soon learn."

The earl spends most of his time sitting alone and brooding.

"I have a son. Understand," he complained, "and I am having trouble with my digestion. I don't like the food here. I expect it is the cooking. I am used to hard work. Now I have nothing to do but hang around."

The Daily Mail representative found that odd enough during the earl finds the weather cold.

Long Pacific Hop Planned

Lieut. Harold Bromley Will Attempt Non-Stop Trip From Tacoma To Tokio

Tacoma, Wash.—A non-stop aeroplane flight from Tacoma to Tokio is to be made as soon as wind and weather conditions are favorable, it was announced here by Lieutenant Harold Bromley, a native of Victoria, B.C., and a group of Tacoma capitalists who are backing his project.

Through the Tacoma chamber of commerce it was announced the financing had been secured and purchase of the 'plane negotiated.

Bromley is confident of success. He has said, that he has taken into consideration everything of safety to ensure success for his venture and safety for himself. The plane's wing is being studied below the fuselage rather than above and in case of motor failure he could drop all his gasoline in 15 seconds and float high above the hollow wings. The plane is entirely of wooden construction.

British Liberals Start Drive

Four Thousand Speakers Have Started On Election Tour

London, England.—The great Liberal drive for victory in the general election has started and Liberal workers preaching Rt. Hon. David Lloyd George's new unemployment redivival scheme, will visit every nook and cranny in the country until everybody knows it by heart.

As far as is humanly possible every district will have at least one visit from one of the big guns who are planning to start at various points in England and Wales, and to make lightning tours of the kingdom, converging on Scotland before the dissolving of Parliament.

Rt. Hon. David Lloyd George, the party leader, will open his tour in Wales.

Million For University

Item Is Included In Budget Of Manitoba Premier

Winnipeg.—Among the budget proposals to be made by Premier John Bracken at an item of $1,000,000 for the start of construction on Manitoba's new university buildings. The university government debated long over the question of the location of the new site—and refused to announce their decision.

The budget speech of the governors and the government are expected to meet with government representatives in hopes of reaching an agreement of some sort on the matter.

Libel Action Costs Heavy

Toronto.—Taxation of the bill of costs, submitted by Mr. Hellmuth, K.C., counsel for Sir Arthur Currie, commander of the Canadian Corps in France during the great war, in his libel action last month, has added to the costs allowed totalled $5,377. The amount charged before taxation was $11,087. In addition to this, defendants will have to pay judgment of $500.

Prince Reports For Duty

London England.—Prince George, youngest son of the King, reported for duty at the foreign office April 3, and spent the morning in a meeting with junior colleagues. The prince who has abandoned his career in the royal navy, is attached to the western department at the foreign office. The prince returned to Buckingham Palace for luncheon.

To Meet At Saskatoon

Moose Jaw.—The next annual convention of the Saskatchewan Educational Association will be held at Saskatoon, and it is expected that at the same time the annual convention of the Saskatchewan Teachers' Alliance will be held in the same city. Official announcement of the decision to hold next year's conference in the northern city was made here.

Two Killed In Plane Accident

Pilot and Passenger Lose Lives In Crash At Khedive, Sask.

Khedive, Sask.—To the sudden panic of a passenger, unnerved by the swooping ascent and gyrations of the aeroplane in which he had sought the thrill of a first flight, is attributed the tragic crash here that cost the lives of Flying Instructor Roland Ford, of Regina, and John Sydenbank, a C.P.R. section foreman.

Trapped in the enclosed cockpit of a dual-control Velie Monocoupe when the right wing of the 'plane, in which the two were flying, fouled a telephone wire, they were plunged downward with terrific force, and death either came instantly from concussion, or else they perished in the flames that immediately enveloped the crumpled machine.

The coroner's jury which investigated the tragedy came to the merciful conclusion that the victims were either dead or unconscious and were thus oblivious to suffering. On the other hand, a Regina pilot who visited the scene and examined the wreckage of the plane in the light of all the circumstances, expresses the opinion that the crash was not sufficiently fatal to cause the deaths of Ford and his passenger. He believes the two fought vainly to escape from the blazing death before succumbing to the flames.

CANADIANS IN U.S. ARE SUBJECT TO DEPORTATION

Washington.—Thousands of Canadians are certain to be affected by the "absolute deportation" law, which passed near the close of congress, Mabel Walker Willebrandt, assistant secretary of Labor, one time commissioner-general of immigration, told the Daily Mail. Assistance will be given to enforce the law.

Washington.—Thousands of Canadians are certain to be affected by the "absolute deportation" law, which passed near the close of congress, Mabel Walker Willebrandt, assistant secretary of Labor, one time commissioner-general of immigration, told the Daily Mail. Assistance will be given to enforce the law.

In the first group are those who entered this country without payment of the head tax of $8 before 1917 when the tax was first imposed, and June, 1921, when the first immigration exclusion act went into effect. They are not at present materially affected. They cannot be deported as the statute of limitations has outlawed the offence. Steps are being taken in congress to validate their residence.

In the second group are those who entered without paying a head tax between June 3, 1921, and July 1, 1924, when the policy of strict exclusion was put into effect. Members of this group also are in no danger of deportation, as the statute of limitations has operated to protect them from deportation, but unless they take steps at once to validate their residence, they can never safely leave the country for more than a short visit to relatives in Canada. If they cross the international border they can never get back except by complying in all particulars with the present immigration laws.

Men and women who have slipped into the country since July 1, 1924, comprise the third group and are affected by "absolute deportation" law. They are not protected by any statute limitations, as the 1924 law specially provided that the statute would not apply. The government reserved the right in that law to proceed against illegal residents at any time, even 20 years hence.

Many in this group have obtained employment, have built homes, and to all intents and purposes are permanent residents, but if they are known to the immigration authorities they are in grave danger. If they are arrested, found to have evaded immigration laws, and sentenced to deportation, they can never hope to return to the United States.

Three Killed At Sudbury

Men Smothered By Fall Of Rock In Nickel Mine

Sudbury, Ont.—Caught in a slide of muck three men were smothered to death at the 4,400 level of the International Nickel Co., 20 miles west of here.

The men had gone on shift and were working on a rise along the foot wall between the fifth and seventh levels when a block of muck which had been blasted the previous evening gave way. The three men were buried down a distance of 20 feet and birled in the falling muck. Two hours after rescuers reached the bodies, which were brought here.

Missing For Three Months

Boston.—The Boston Herald says that 17-year-old Rosamond Morse, daughter of Edward W. Morse, Jr., wealthy Brookline resident, has been arranged missing from home since the night of January 4. A nation-wide search by private detectives and police has been unsuccessful.

Advertising Man Dies

Winnipeg.—Robert James McPherson, 56, president of McPherson-McCurdy Advertising Agency, is dead after a year's illness. Born in Kincardine, Ont., he was educated first at Queen's and later at Manitoba University.

RESIGNS IMPORTANT POST

Lord Lovat, who has now almost given up public life, has resigned from the chairmanship of the overseas settlement committee owing to ill-health. He resigned as parliamentary under-secretary for Dominion affairs last December.

Scholarships For Research Workers

Students Of Outstanding Merit Have Been Selected For Awards

Ottawa.—Sixty of the applicants for post-graduate scholarships from the national research council of Canada have been granted either fellowships, studentships or bursaries for 1929 according to announcement made by the scholarships committee of the council. Out of the hundred applications before the council those of outstanding merit have been selected for the awards.

The list contains names throughout the breadth of the Dominion and allows for the continuance or approximately $50,000 for research which will be followed at various Canadian universities.

The purpose of the annual endowment of individuals with money grants by the national research council is to assist in building up in Canada a corps of thoroughly trained research workers capable of undertaking and directing scientific research on Canadian industrial problems or in connection with the development of Canada's natural resources.

The scholarships go to university graduates who are following some line of scientific investigation at university laboratories.

Serious Epidemic Of Meningitis In China

Steamship Officials Take Steps To Prevent Spread Of Disease To Other Countries

Shanghai, China.—The meningitis epidemic having reached serious proportions here officials of steamship lines have decided not to accept steerage passengers from Shanghai bound for Canada and the United States. The action was taken in an attempt to prevent the possible spread of disease to these countries.

Owing to lack of statistics accurate information of the number of cases was lacking but it was known to be large. In the Shanghai area authorities estimated there were one thousand cases being treated. Many deaths have occurred within a radius of one hundred miles of Shanghai.

Will Operate New Hotel

Toronto.—The Canadian Pacific Railway has agreed to operate a new hotel to be erected in Guelph by Arthur W. Cutten, Chicago grain operator, according to E. W. Beatty, president of the railway, who is visiting Toronto.

Pacific Yields Clue To Aviation Tragedy

Parts Of Airplane Found May Solve Ocean Mystery

San Francisco, Calif.—Parts of an aeroplane, twisted into weird shapes and water soaked, were brought here to determine whether they might aid in the solution of a tragic ocean mystery, either during the Dole flight to Honolulu or army and navy manoeuvres off the coast.

Most of the evidence indicated they were parts of a United States government craft which disappeared in 1922 or 1923 during a flight off the Pacific coast, attendants at Mills Field, the municipal airport, said after a brief examination.

There were also several indications that the hardly distinguishable struts, rudder and frame might be parts of the 'plane in which Captain William P. Erwin, American war ace, and Lieut. Leo Nagle were expected to their death while 500 miles from here on their way to Honolulu in 1927.

Express Confidence In Bracken Government

Labor Resolution Defeated 31 to 19 In Manitoba House

Winnipeg.—By a vote of 31 to 19, confidence in the Bracken Government was expressed by the Manitoba legislature, when a Labor resolution demanding an investigation of the Seven Sisters Falls contract, awarded by a committee of the House was defeated.

The issue had been regarded by the premier as one of want of confidence. John Queen, Labor leader, moved the resolution, which read:

In the division the government had the support of the Liberal members, including Hi. A. Robson, Liberal leader, Conservative, Independent and Labor members supported the Queen resolution.

After the session opened Premier Bracken and the leaders of the various groups paid tribute to the late Hon. Hugh John Macdonald in a standing vote, a resolution of sympathy was unanimously adopted.

SUBSIDY SYSTEM FOR PROVINCES IS CONDEMNED

Ottawa.—Manitoba would not have been "one cent better off today" had she refused to accept her natural resources from the time she was made a province, declared A. R. McMaster, K.C., senior counsel for the Dominion, appearing before the Manitoba natural resources commission and concluding his argument against the province's claim to control administration from the Federal Government for alienated lands.

"Better natural resources," he said, referring to those which remained unalienated, "are now being returned."

Those alienated are more than offset by the vast Federal capital expenditure in their administration since 1871. What Canada has done for Manitoba has more than compensated for any possible loss."

While admitting that to follow the strict-construction of the Federal cabinet, Manitoba must be placed in a position of equality with other provinces and must not be discriminated against, Mr. McMaster declared that "the Dominion must not be placed in a worse position than she would have been in had Manitoba kept her natural resources from the start and administered them herself."

The subsidy system, he declared, was vicious. It was wrong for a commission be chary in increasing such payments. It was a bad principle for one government to collect taxes and another to use them for revenue. The practice should be kept in as narrow confines as possible, curtailed as far as was practicable, in justice to all.

"Manitoba is not a poor sister," he continued. "If she is treated with lavishness that will be the demand for similar treatment from east and west. One claim will lead to another. It may become a case of general danger here—an endless ring of demands upon the Federal Government.

One of two things would be the result of such a situation. Either Dominion service would have to be curtailed or else taxation would have to be increased. The one avenue open to the Government of Canada to increase revenue was through its customs duty, he believed, and that would touch the pocket of the consumer.

Mr. Justice Turgeon, chairman of the commission, asked Mr. McMaster what he would suggest in place of subsidies which he was condemning. Mr. McMaster replied that he would rather see a lump sum paid to Manitoba, if compensation were necessary, than have an increase in allowances. But that was his own opinion, he added. He had no instructions to offer any such suggestion.

Mr. Justice Turgeon pointed out that the subsidy system was provided for in the Confederation pact and was meant to relieve the provinces surrendered avenues of revenue through customs duty.

A. J. McPhail Tells U. S. Senate Committee About Wheat Pool Idea

Plan New Road To North

Railroad From Emerson To Fort Churchill Is Projected

Winnipeg.—Authority to build and operate a railroad from Emerson, Manitoba, to Fort Churchill, Man., on the east side of Lake Winnipeg, with additional powers to establish a steamship line to Churchill and to construct elevators, warehouses wharves and terminals there, is asked in a petition read and received in the Manitoba legislature.

The petition is made by the Emerson-Churchill Promotion Company, Ltd., and nine others under the name of the Emerson-Churchill Colonization Railway Company.

Emerson is situated on the border between Manitoba and the state of Minnesota, about sixty miles south of Winnipeg. Churchill, the terminus of the Hudson Bay Railway, is approximately 1,000 miles north of Emerson.

The scheme presented to the legislature represents capital stock for $5,000,000, the petition states, divided into fifty thousand shares of $100 each, with the provision that only one-in-council the stock may be increased to any amount not exceeding $50,000,000.

The issue had been regarded by the premier as one of want of confidence. John Queen, Labor leader, moved the resolution, which read:

In the division the government had the support of the Liberal members, including Hi. A. Robson, Liberal leader, Conservative, Independent and Labor members supported the Queen resolution.

After the session opened Premier Bracken and the leaders of the various groups paid tribute to the late Hon. Hugh John Macdonald in a standing vote, a resolution of sympathy was unanimously adopted.

Making Tour Of Canada

League Of Nations Officer To Help In Membership Drive

Ottawa, Ont.—One of the highest officers of the League of Nations is a visitor in Canada. M. Joseph Avenol, Deputy Secretary General of the League, arrived in Vancouver from the Orient and will tour Canada from the Pacific to the Atlantic, speaking on behalf of world peace and the work accomplished by the League.

M. Avenol has been in China conferring with members of the Nationalist Government which has been formally recognized by the League of Nations. He was received in audience by the Chinese President.

The Deputy Secretary-General will be a speaker on behalf of the big drive on behalf of world peace membership to be launched April 16 by the League of Nations society in Canada. The present membership of the League is 21,000 and it is expected this will be well over 50,000 on the completion of the membership campaign.

Will Open Immigration Department In Regina

Permanent Headquarters To Be Established On May 1

Regina.—Permanent headquarters of the Department of Immigration for Southern Saskatchewan will be established here May 1, according to an announcement made by Geo. Todd, of the Immigration Department, who will be in charge of the new office.

Mr. Todd explained that there had been a growing need during the past year for such an office in Regina, and that temporary accommodation had been secured in the Veteran Block pending the last month. The new Regina office of the department will be situated in the Darke Block, and will be in a similar position to those already established at Saskatoon, Calgary and Edmonton.

Washington.—Not only has the Canada Wheat Pool been of distinct advantage to the wheat farmers of Canada and tended to increase the prices they have obtained for their product, but it has had an influence on the whole wheat market, according to A. J. McPhail, president of the Central Selling Agency for the grain of the Western Canadian pools, who discussed the subject before the Senate committee on agriculture here.

Mr. McPhail came before the Senate committee by special request of the chairman, Senator McNary. Not only was he warmly thanked by Senator McNary and members of the committee for consenting to be present, but senators expressed the view that the information which he set forth as to the workings of the Canada Wheat Pool would be of great use in working plans in this country for farm relief.

Not the least interesting phase of the whole wheat pool suggestion in this country and Canada by co-operating with respect to the marketing of exportable wheat could control the world market to a still greater degree than it has already been influenced by the Canadian Pool.

Senator Brookhart of Iowa, asked a series of questions of Mr. McPhail on this point. While Mr. McPhail made no commitment on the policy of co-operation, he indicated that the Canadian Pool working with some similar organization in this country could have a decreased influence on the world market.

Mr. McPhail gave a sketch of the history of the formation of the pools of Manitoba, Saskatchewan and Alberta, and their uniting in the formation of a central selling agency. Mr. McPhail declared that while the farmers of Western Canada in 1923 and earlier were anxious to have the organization controlled by a wheat board plan, it is now the general feeling of the farmers that the pool has been the ultimate result in the creation of a spirit of independence and self-reliance among them as well as increased knowledge of their own business. He declared the success of the pool had been a great incentive to the general co-operative movement in Canada.

"The farmer," he said, "is taking more interest in his own organization. There is a deep-seated individual sense of responsibility for the success of the organization."

He said the pool marketed 52 to 54 per cent of the wheat in the three provinces and carried on a continual campaign of education among the farmers in order to increase the membership.

Members of the committee were interested to know that the Pool is financed wholly by the banks and not by the government, and that borrowings sometimes reach $65,000,000.

Michigan Law Repealed

Famous Life - For - a - Fist Law is Revoked

Lansing, Mich.—Michigan has revoked the famous life-for-a-fist law. Governor Fred W. Green signed the Watson House bill eliminating 120 "minor" felonies from the list of crimes which draw the life penalty for fourth offences.

Governor Green said he would commute the sentences of Mrs. Ella Mae Miller, Chamie Tripp, Tony Papich and others who are serving life sentences for liquor felonies.

Uruguayan Fliers Safe

Bogota, Colombia.—Two weary aviators for whom all hope had been abandoned have turned up at Tumaco, southermost port of Colombia, after a two days' voyage in a small boat along the coasts of Ecuador and Colombia. The Uruguayan fliers declared they had been forced down in Northern Ecuador and their plane destroyed.

Canada Takes Formal Action In Connection With The I'm Alone Case

Ottawa. — The sinking of the Canadian schooner "I'm Alone," by United States coast guard vessels has been the subject of formal representations by the government of Canada to the United States.

This was stated in the House of Commons by Right Hon. W. L. Mackenzie King, prime minister, answering a question by Hon. R. B. Bennett, Opposition leader.

Mr. King stated that the "I'm Alone" case had been the subject of correspondence between Ottawa and Washington for the past week. He also said that the correspondence in this case would be brought down in due course.

Washington.—Word from Ottawa that the Canadian Government had decided to make the sinking of the Canadian rum-runner "I'm Alone" subject of formal representation to the American Government was interpreted by official and diplomatic circles here as a move on the part of the Canadians to bring the anti-rum-smuggling treaty up for formal discussion.

There has been an inclination during the past few days in some quarters in Washington to believe that the Canadians might drop the case, hence no move in the way of an apology or steps to straighten out the matter were made by the American authorities.

It is generally believed the Canadians are more interested in the treaty than they are with the actual sinking.

Laurentian Spring

The photograph reproduced above is a purely amateur study, but it is a fine illustration of how the great Laurentian district north of Montreal lends itself to pictorial art. It is used by the Tourist Department of the Canadian Pacific Railway to lure the fisherman from his home at Canada's most picturesque playground possibilities, it does not demonstrate the glorious beauty which every true angler appreciates equally with opportunity to demonstrate his art.

It's the money you spend wisely that counts

SOMEONE has said that a rich man has more fun keeping a budget than a man of moderate means. Because the money he saves is tangible, he can see it and invest it, and put it to work. Be that as it may, a budget is an invaluable help to anyone.

A budget helps you keep the right proportions between expenses, prevents you from spending more than is best for food and rent, or crimping more than you should on entertainment and luxury. *But a budget is not a reason for getting cheap things, things in which you forfeit quality by attempting to save on price.* A budget says to you: "Here is the amount of money you should spend for this. Spend all of it, but don't spend more." And it is up to you to get the best that can be got for that amount.

The person who spends his money wisely, who likes to get the utmost for it, always finds out from the advertisements how he can spend it to the best avantage.

It is surprising how much more wisely you can buy if you make it a habit to read advertising. A little more value here . . . a little better workmanship there . . . in this thing slightly more durability . . that product perhaps a bit finer. And every cent of money you spend for advertised merchandise will bring you greater comfort, a higher quality of goods, and a standard of excellence that is nationally recognized.

It certainly pays to read the advertisements

Extension And Improvement of Park Highways

Much Engineering and Construction Work Carried on in Canada's National Parks in 1928

In Canada's 11,000 square miles of national parks steady progress is being made in opening up new and outstanding points of scenic beauty to the motorist and the tourist. Engineering and construction work carried on during 1928 by the National Parks Branch of the Department of the Interior greatly increased the facilities for the comfort and enjoyment of visitors, and preparations for the coming season's tourist flow are now well advanced. The motor roads in the national playgrounds in the Western Provinces were extended during last year and considerable maintenance and improvement work carried out so that there are now slightly over 400 miles of first class highways in the parks. In addition the mileage of lots or secondary roads has been increased to a figure close to 100, new riding trails have been laid out and completed, the installation of a new sewage system in Jasper townsite was begun and considerable other improvement and maintenance work of lesser importance carried on.

From the highway standpoint, the largest work undertaken during 1928 was the construction of of new trunk road in Prince Albert national park in Saskatchewan. This road extends from the southern boundary of the park, which is thirty-five miles north of Prince Albert, to the center of park activities at Waskesiu lake, and is approximately thirty four miles long. Grading was completed by the end of Octobre and the bridges were in place in January of this year. It will be officially opened to traffic during the coming summer. In Banff park, Alberta, a new road, with a maximum grade of six per cent was built from the town of Banff to the new public motor campsite at Tunnel Mountain. This road is three-quarters of a mile long and of standard width. A considerable extension was made to the Akamina Pass road in Waterton Lakes park. This which will eventually connect Alberta and the park with Flathead River valley in British Columbia and Glacier Park in the United States. Through the co-operation of the town of Waterton, the adjacent municipalities, and the National Parks Branch, a new road was constructed from the town to the entrance to the main paddock in Buffalo national park. In Jasper and Yoho parks considerable maintenance work was done on highways and trails while the Mount Revelstoke motor road was extended to the lookout point at the summit, this being the final objective. This road, starting from the town of Revelstoke at an elevation of 1,492 feet, reaches an elevation of 6,215 feet in a total length of 16½ miles. In Elk Island Park some much needed road construction was undertaken, a new road being opened up from the north gate of the park to Sandy beach. The latter place is a very popular bathing and picnic resort.

A number of new bridges were erected along the main highways, while others were improved to meet the steadily increasing motor traffic. At Jasper a an 80-foot single span bridge was built over the Miette river on the Edith Cavell road, and a new 100-foot span bridge was constructed over the Otter-tail river on the Field-Golden road. This latter has an 80-foot span and a clear width for traffic of 17 feet 6 inches. The decks of three important bridges in the Kicking-horse canyon were renewed on the standard width.

Considerable other important work was carried on in the national parks in the West. A start was made in Jasper townsite, Jasper national park, on a new sewer system, about one mile of fifteen-inch pipe being laid during the season. In Waterton Lakes park, Alberta, a new bath-house was completed at the Radium Hot Springs, ninety miles west of Banff. The swimming pool was also extended thirty feet and deepened to give a standard size of 75 feet by 150 feet. The spring was discovered when foundation excavation was under way. Provision was made in the lower concrete wall of the pool for an outlet to supply a small hydro-electric plant to serve departmental needs. The plant will utilize the hot spring water running from the pool, thus doing away with ice troubles in the winter months. Maintenance and extension work was also carried out in Banff, Waterton Lakes, Yoho, Glacier, Buffalo, and Elk Island parks.

In the eastern national park areas a large amount of work was done in connection with development and improvements. Two wharves to accommodate ferries were constructed at Rocky and Cedar island in the St. Lawrence Island parks. Complete repairs were made to the Shoal martello tower in Kingston harbour. Extensive restoration work was carried on at Fort Chambly, Quebec, and other maintenance work done at St. Hows and Fort Beauséjour in New Brunswick.

Canada's Experimental Farms

The Dominion Experimental Farms system of the Department of Agriculture stretches across Canada from the Atlantic to the Pacific, and is the most comprehensive system of its kind to be found in the world.

THE DUTY OF HAPPINESS.

The world would be better and brighter if our teachers would dwell on the duty of Happiness, as well as the Happiness of duty.

—Lord Avebury.

He who wants health wants everything.

Big Values in unused transportation

look at these

1 Chevrolet Touring Car
$400.00
1 1928 Chevrolet Truck
$750.00

EVEN at ordinary prices, a Used Car gives you more miles of automobile transportation for your dollar than you can get in any other way—because the original owner has stood the heavy first-year depreciation.

Now, we offer you a double bargain . . Good Used Cars, at phenomenally low prices! We want to clear out our entire stock of used cars to make way for new Chevrolets coming in. It would cost us money to carry them and store them until summer. So we're turning that money over to you; making it worth your while to BUY now.

Look at the cars . . and the prices . . and you'll agree you've never seen such values in UNUSED TRANSPORTATION. It's an opportunity that you may never get again.

British Boys Arrive For Farm Training

The first group of British boys, forty in number, coming to Alberta during the present season under the arrangement between the Provincial Government and the Overseas Settlement Board arrived in the province during the past week. They have been equally divided between the schools of agriculture at Vermilion and Olds where they are being given a month's practical training in Canadian agricultural methods which will fit them for work on farms in the province. At the conclusion of their month's course another similar group is expected to arrive and following this two groups of young British women will come forward at intervals of a month for courses of training in practical home economics before being placed as domestic farm help.

Soldier Settlement Farms Being Revalued

Good progress is being made in the revaluation of farms occupied by soldier settlers, according to announcements made by officials of the Dominion Land Settlement Branch. A good start was made with this work last fall, and inspectors of the Settlement Branch will continue their duties along this line in many districts in the province as soon as road conditions permit.

Suffield Line of the C.P.R. To Be Completed

Completion of the Suffield branch of the Canadian Pacific Railway connecting Arrowwood and Blackie will be commenced during the present year, it is announced by D. C. Coleman, Western Vice-President of the C.P.R. It is planned to start grading during the summer, and it is expected that the line will be ready for operation during the spring or summer of 1930. Completion of this road will bring a large section of important grain growing territory within a much closer hauling distance of Calgary and the Pacific Coast.

Canada Geese Increase When Protected

Very rapid increase has taken place in the number of Canada geese in the Vaseaux Lake bird sanctuary, British Columbia, since this area was set aside for this purpose in 1923. In one part of the reserve, an island in the lake where only three geese nested in 1919, thirty-five nests were counted in 1928. Throughout the whole sanctuary the number of nests counted in the latter year was fifty-five, whereas in 1923 the number of incubating birds was very small indeed. During last summer over four hundred geese were counted at one time.

Health Service of the Canadian Medical Association

THE HEALTHY HOME

Very frequently we have mention ed that the health of each of us depends, in large measure, upon our selves. We must make use of the information given to us concerning the prevention of disease and the maintenance of health if it is to be of any practical value. In the same way, it is true that whether or not the home is a healthy one depends upon the people who live in it. But that being true, it is also true that some homes are built that it is very difficult, if not impossible, to make of any one of them a healthy house.

When a house is built or rented, the question as to whether or not it is so constructed and so situated that it can be made a healthy home, should receive attention. Some of the points which are of the greatest importance are brought to the attention of our readers.

Every room in the house should have a good-sized window which opens and looks out upon a street, a yard or a large court. This allows for the free entrance of air into the room. Air is an absolute necessity and, therefore, rooms without windows opening into the outer air are unfit to live in. Alcove rooms without a window are practically as bad as windowless rooms, as they are impossible to ventilate.

Every home should have reasonable facilities for cleanliness. There should be a kitchen sink, wash-basin and bath, with hot-water connections. Body cleanliness and particularly clean hands are important. If the hands are to be washed regularly before meals, if teeth are to be cleaned twice a day, if a hot bath is to be taken at least once a week, it is necessary that facilities be provided for all these.

The kitchen is an important room because diet is so important. Proper places for storing food and milk and adequate facilities for washing dishes, all make it much easier for the housewife to prepare and serve the varied diet that is required for health.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

HE IS RISEN

"The Lord is risen indeed;
He lives, to die no more:
He lives, the sinner's pause to plead,
Whose curse and shame he bore."

The Tearing o' the Green

Now comes the time of the year when the sound of the niblick is heard in the land and the wild and untameable divott shakes off its winter underwear and starts prowling around fairways and greens in search of easy victims. How the heart of the golfing fanatic rejoices at the approach of the season when he can once more pander to a depraved and peace-disturbing vice. Forsaking home, business engagements, devotional duties, creditors and blonde stenographers, he hies forth to an expensive hand-manicured sheep pasture located far "from the madding crowds ignoble strife"—and three miles from a street car. Donning the weird and outlandish garments of his calling and armed with a collection of strange, odd-shaped weapons, he proceeds to carve the hand-kept and segregated sod into varied geometric patterns, diverging occasionally to do a little tunnelling and excavating.

It is an eye-filling and humorous sight to see a middle-aged addict of the game—especially one plentifully endowed with prime leaf lard—"making ready" to whale the everlasting daylights out of a small whitewashed rubber pill. Weird and peculiar are his postures; strange and inexplainable are his antics, to say nothing of his language, which at all times is loose-jointed, descriptive and saturated with sulphur.

Placing the ball in a defenceless position, and seemingly with out the slightest provocation, he attacks it in a ferocious fashion as though to mar its usefulness forever. The ball eludes its assailant and leaping into the air, dives into the recesses of some convenient wrought-iron shrubbery and disappears from human ken or vision.

Now comes the supreme test of the game. To successfully track a malignant, demonical-minded and evil-intentioned golf ball, calls for woodcraft faculties of no mean order. The successful golfer must possess the unerring scent of a blood-hound, the tenacity of fly-paper, the hopefulness of an old maid, the reasoning of a Sherlock Holmes, and the ability to look placid and unperturbed whilst red, white and blue anarchy is sweeping through his "corpora callosa."

The ball does not always successfully elude its pursuers. Cases have been known (principally in Scotland and somtimes in Wales) where a golf ball has been located the same day—but this only after long and arduous searching.

Some attention should be directed to the costumes worn while playing the game. Many weird and outlandish sartorial absurdities are always seen upon the links, and patterns run the gamut through angles, squares, cubist, rail-fence and rattle-snake designs, horse blankets, Scotch plaids and other bewildering arrangements, all done—like Joseph's coat of old—in many odd and startling colors.

Too many regard "gowf" as a relaxation from business cares, a source of pleasure, an opportunity to temporarily evade bill collectors, or a chance to wear funny clothes but this is not all of it. To painstakingly search for hours for strayed balls, to dig up acres of sod, to excavate caves and cellars in good lots, to tramp for hours o'er hills and hollows beneath the blazing sun, while a small, undersized caddy staggers along under a shifting load of shelf and heavy hardware, calls for stamina, fortitude and endurance.

When darkness falls the golfer returns to his anxiously waiting family. With a pair of feet that feel like boiled suet puddings, a dose of poison ivy, half an acre of sunburn, a pint of gin under his belt and a pain in his vermiform appendix, he will claim it to be a perfect day. Emotional insanity appears to be on the increase.

—Canadaink.

Baby Beef Brings Record Price

A record price was established at the Calgary Spring Show during the past week when the first prize calf in the Boys' and Girls' Calf Feeding competition sold for three dollars a pound. This calf, an Aberdeen Angus, shown by Harold Richardson, Bowden, was an outstanding winner in its class. It was purchased by Mrs. Hind, of Hind's Meat Market, Calgary, and at a weight of 940 lbs., brought its young owner the handsome return of $2,820.

Close Season on Muskrats

A close season has been declared in that part of Alberta between the North Saskatchewan river and township 90, from April 15 until March 15 following, and in that part of the province north of township 90, from May 15th until March 15 following according to the Alberta Gazette.

Adversity makes men, but prosperity makes monsters.

Area Of Land Under Crop In Western Canada Will Be Greatly Enlarged This Season

From the Dominion Bureau of Statistics comes a report upon the acreage of land that has been prepared in the prairie provinces for the growing of crops in 1920. That report shows that approximately 19,000,000 more acres of land are now ready for seeding than had been prepared at this time last year. The report thus suggests that the work of the farmers in western Canada is further advanced than it was at the same date in 1920. The statement of the bureau of statistics adds the information that there has been an increase in new breaking in Manitoba and Alberta and may indicate, by this announcement, that the area of land under crop in the prairie region will be enlarged in 1920. Possibly, then the expansion of the wheat-growing area in western Canada is to be continued this year. To those who look back over the records of progress in agriculture in this country that expansion will seem to have been unavoidable. In 1901 the total area of land under wheat in Manitoba and the Northwest Territories was 3,010,435 acres. Ten years later the acreage had grown to 9,428,474. By 1906 the amount of land employed for the cultivation of wheat on the prairie had reached 17,000,000 acres. In 1911 it had almost doubled again and amounted to 9,301,293 acres. In 1921 wheat lands accounted for 23,000,000 acres out of a total of about 37,000,000 acres used for the raising of cereal crops. In 1923 a total of 30,000,000 acres was in wheat and in 1928 approximately 23,000,000 acres.

The expansion of the wheat-growing area in prairie provinces, of course, has accompanied the increase in population in that part of the dominion. Each settlement and wheat-growing, too, have been stimulated by the development of the Marquis variety of hard spring wheat and subsequently of other and other strains of wheat suitable for cultivation in the prairie region. The experiments of Dr. William Saunders and his sons, which resulted in the production of the Marquis wheat, were undertaken with the object of making available for farmers on the prairies a good variety of the grain that would mature more rapidly than varieties then in use. The success of those experiments, it has been said, very greatly enlarged the territory in the western half of the dominion within which cereals could be successfully grown. Improvements in farm machinery, the use of tractors to draw plows and binders and, of late, the introduction of combined reapers and threshers have all assisted the western farmers to extend the area of the wheat lands of the prairies. Last year those lands produced Canada's largest wheat crop. While the quantity of that crop was satisfactory, the quality of it was disappointing. The lowering of the grade of the crop was due largely to a factor beyond the control of the farmers, namely, the severe frost in August. While that is so, there have been complaints that in some districts a proportion of unsuitable and even poor varieties of wheat had been sown and it has been reported that in the prairie provinces, as well as in some other provinces, there is need for action to check the spread of noxious weeds. At any rate, discussion of the grading of the great crop of 1928 will emphasize the importance of attention to the quality as well as to the quantity of the wheat grown in Canada.

Prairie Tourists To Have Sea Cruise

Personally Conducted Tour Arranged By the Canadian National Railways

"Low land and high land and out along the sea." This line of verse applies perfectly to the summer tour which will leave the Canadian National Railways' Station at Winnipeg on July 1. Beginning here, the tour which will be personally conducted, will cross the prairies, Saskatoon and Edmonton, will tarry in Jasper National Park, will strike north through Prince George to Prince Rupert, and will then drop down the coast of Canada on the Pacific Ocean to Vancouver.

Many reservations have already been made to say nothing of inquiries, and there is evidence enough that this year's tour will be as popular as last summer's.

On the way out, the travelers will spend the afternoon at Winnipeg and will have an opportunity to bathe in Little Manitou Lake, a mineral lake unique in the prairies. They will see Saskatoon and Edmonton and will drive through Wainwright Buffalo Park. After a day at Jasper, seeing the Lodge in the mountains, golfing and motoring or exploring the mountain peaks, they will see the supreme attraction of Bulkeley Gate and Canyon—one of Canada's wonders—and they will walk through the log cabins of the village of Kitwanga, which bristles with totem poles. The trip from the mountains to the Prince Rupert and Vancouver, along the placid shelttered sea, will be a pleasure in itself, climaxed by a tour of Vancouver, and then the travelers will be free to go as they please.

Better Turkeys in the West

Association Of Turkey Breeders Formed In Alberta To Help

Breeders of turkeys in the province of Alberta have realized that their industry would be greatly helped by a more general use of larger and better breeding stock. Culls, inbred and fifty breeders of bronze turkeys in the province of Alberta have organized themselves into an association and with the assistance of the Live Stock Branch of the Department of Agriculture, at Ottawa, are handling their birds classified according to their quality. Three grades of birds have been decided on and the idea is that each of the shipments of the different grades are legended accordingly. The highest grade, to be known as "A" grade, are birds of "fine form" and "good" plumage, weighing 25 pounds and upwards for young males, and 16 pounds and more for young hens. The second or "B" grade have to weigh at least 23 pounds for the young males and 15 pounds for the young hens. Birds are shown in the "B" grade even though they show minor defects in plumage and form. The third grade are birds of poor or good type and weigh at least 20 pounds for younggg tons, and 13 pounds for the young hens. The breeders have already had their breeding birds inspected, approved and banded according to the grades to which they belong.

Game Fish Hatchery

Stocking Alberta's Streams With "Trout and other Fish

Plans are under way for a game fish hatchery in the Edmonton district making a total of three in Alberta. The other two are at Banff and Waterton Lake. Each can handle 1,600,000 fry a season. Alberta's streams have been stocked steadily since the war and trout fishing has been greatly improved. Including the Red Deer and north the streams are stocked with Loch Leven and Brown trout, fall spawning species, and south of the Red Deer with cutthroat, rainbow and steelheads, spring spawners.

A Gesture Of Defence

The automobile brought the pavements; the hard pavements brought the skull fractures. It is up to mankind, when knocked down by this new engine of destruction, to imitate its cranium. Of course, the ideal perfection is the headgear of the football player, but until these can be made to look dignified, the first public should be taught to throw up its hands to its head as soon as struck by an automobile.

A Model Townsite

A model townsite is to be laid out at Churchill, the seaport terminus of the Hudson Bay Railway, which is being built by the Canadian Government from The Pas, Manitoba. Title to all the land controlled by the townsite will remain vested in the province of Manitoba and disposition of parcels will be by long term lease.

Mrs. Knagg—I told you to watch little Jane Marie while I was out and you let her cut her new dress all to rags.

Her Husband—I know. I was watching her while she did it. Did you wish to me to interfere?

Modification Of Hog Grading Regulations

New Regulations Announced By Hon. W. R. Motherwell

A modification has been made in the hog grading regulations administered by the Live Stock Branch of the Department of Agriculture, at Ottawa. The new regulations, which have been announced by the Hon. W. R. Motherwell, Minister of Agriculture, provide for the classification of hogs into two classes, namely, bacon hogs and non-bacon hogs. The bacon hogs will be divided into two grades to be known as "selects" and "bacon." The standard for the "select" hogs remains the same except that the minimum weight of 170 pounds as they are taken from the cars or 180 pounds after being fed and watered. This is a new grade and the hogs must be of the same general characteristics as select bacon hogs, but may lack some quality or length in general quality as compared with "selects." A third grade to be known as "butcher" will have a weight range of from 150 to 230 pounds when unloaded from the cars, or 160 to 240 after feeding and watering in the yards. Hogs of this class will include all those of smooth fleshing and good finish that do not conform with the standards of the two other grades. The new regulations provide for the compulsory grading of all hogs and shipping points. Under these regulations it will be possible to get the information regarding the grade back to he farmer. By these new regulations the hogs will be sold in accordance with the actual commercial value of the stock.

Moving Canada's Grain To the World's Markets

Wheat Shipped To Britain Cheaper Via Vancouver Than By Eastern Route

Cost of laying down a bushel of wheat in the United Kingdom averaged one cent more via Vancouver than via New York and Buffalo, and it is a cent cheaper than the Montreal route, George McIvor, general manager of the Canadian Wheat Pool told the royal grain commission at Winnipeg. Mr. McIvor explained in detail the methods of moving Canada's grain to world markets. The Japanese, he said, preferred to supply their requirements by the Pacific and purchased all their grain f.o.b. Vancouver. United Kingdom buyers of grain at Vancouver and eastern points declared a bushel basis to Liverpool thus making certain as to time of arrival and doing away with the personal details of arranging their own tonnage.

The average cost of getting wheat from Vancouver to Liverpool was 9.67 cents per bushel, from New York 28.86 cents, and from Montreal 28.86 cents, witness stated.

Mr. McIvor explained that the pool board met in Winnipeg monthly and in consultation with salesmen determined prices at which the grain should be sold. It was the fixed policy of the pool to sell or offer for sale on the same day at the same price their products to every purchaser wherever in the world. Contracts for space on the Pacific were necessarily made far in advance but at Montreal and other Atlantic ports contracts were frequently made over night.

Woman Lived With Apes

Story Of Negro Woman Apparently Raised By Apes From Childhood

A remarkable story of a native woman apparently raised among apes from childhood, is told in the monthly report of the agent of the German firm of Kristeller, which has plantations in the Kamerun. An elephant hunter saw the group of apes in some trees and shot one, the report states. He found, to his astonishment, that it was a negro woman, probably about 30 years old, customary tatto marks. The mystery was investigated by the authorities, who concluded that the woman must have been brought up from childhood by apes and lived with the group as one of them.

Farmer Brown—What's your son Hiram doing in the big city these days?

Farmer Green — Studying for a doctor.

Farmer Brown—What's the matter? Doctor too lazy to sufy himself?

Mr. Goodson—Well, what do you want?

Benny, the tramp—I wanna know bin I borry a red lantern off'n you? I got a extra sleep in the street to night an' I'll hafta warn the traffic to drive roun' me.

Visitor to Warden—"I want to see Mug McKillikuddy, Number 53892."

Warden—"What for?"

Visitor—"He stole my car and I want to find out how he got it started."

The annual catch of whales in the Antarctic exceeds 10,000 a year.

THE PHANTOM FINN

Here is a flashlight picture of Paavo Nurmi, the famous phantom Finn, taken at Hamilton the night of the big indoor meet, where Nurmi at spread-eagled a field of a dozen Canadian runners in a two-mile miles-and-out race. Nurmi ran the two miles in 9.33 2-5. The record is 9.14 3-5.

Historic Arch Crumbling

Golden Gate Of Stamboul Is Over 1,500 Years Old

The famous Golden Gate of Stamboul, one of Constantinople's greatest historic treasures is falling to pieces.

English experts who have made recent investigations reported that the triumphal arch of the Byzantine emperors, which has stood for more than 1,500 years at the entrance to the City of the Golden Horn, is in a perilous state. Immediate bolstering of the crumbling walls and mighty blocks of marble is needed if posterity is to preserve this jewel of architecture and monument of history.

One slight earthquake, and earthquakes are common in this region, and the Golden Gate will collapse, say the experts. They have approached th Turkish authorities who are sincerely eager to act but who say that they are hopelessly lacking for the necessary repairs.

A Neat Retort

Janet (trying to snub old sweetheart to whom she is being introduced): "Beg pardon, I didn't get your name."

Maxwell: "I know you didn't, but it was no fault of yours. You tried hard enough!"

"What did you see at the theatre last night?"

"Long, fizzily hair, large shoulders, three chins and a broad back."

Women Aviators

Must Compete With Men On Equal Terms In Applying For Pilot's License

Where aviation is concerned, women will have to compete with men on equal terms. This is the dictum laid down by the civil aviation branch of the Department of National Defence, on receiving the first application from a woman, seeking a commercial air pilot's certificate.

Women applying for commercial pilot's license, it was stated, will be required to come up to the minimum requirements of physical strength and endurance demanded from men before they can fly commercial machines.

This ruling was adopted by the Civil Aviation branch, officials said, out of regard for the safety of the flying public. It was explained that no great confidence would be instilled in passengers who, on reaching an airdrome, were escorted into the 'plane to be flown by a small woman.

In the issuing of private pilot's licenses, a distinction is made between the sexes. A woman private pilot is required to possess only seven-tenths of the physical strength of a man. A woman possessing this strength is regarded as normal, while one possessing the strength necessary to qualify for a commercial pilot's certificate would be regarded as supernormal.

An Important Industry

Flour and Grist-Milling In Canada's Second Most Important Manufacturing Industry

The value of production in Canada's flour and grist milling industry has been climbing steadily since 1923, the Canadian Government Bureau of Statistics shows in a recent report on the industry for 1927. The amount of invested capital is also again on the up-grade an increase of over $5,700,000 being shown.

The gross value of production for the year under review was $191,741,470 which compares with $189,380,741 in 1926; and $154,895,991 in 1923.

Flour and grist-milling is Canada's second most important manufacturing industry in point of gross value of production exceeded only by pulp and paper.

In the year 1928, 34,120 Canadians who had gone to the United States intending to remain there returned to the Dominion for permanent residence.

Maple, hornbeam and wild cherry are harder woods than oak.

Winnipeg Newspaper Union Fashion

No. 383—New Elegance. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 2⅞ yards of 40-inch material with 1¼ yards of 40-inch contrasting.

No. 280—Slimming Neckline. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3⅝ yards of 40-inch material with ⅞ yard of 40-inch contrasting and 4 yards of binding.

No. 733—Graduation Dress. This style is designed in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2 yards of 40-inch material.

No. 981—Attractive Junior Frock. This style is designed in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2 yards of 40-inch material.

No. 833—Smart Apron and Cap. This style is designed in nice small, medium and large. The medium size requires 2 yards of 36-inch material with 0⅝ yards of binding.

No. 1114—Ship designs and Household Linens. Pattern contains two ship designs, measuring about 12¼ inches wide and 6¼ inches high, including the water line; also pattern motifs for trimming household linens, measuring 7⅜ inches wide, and 3 inches high (blue).

We suggest that when you send for this pattern you send 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cut designs for kiddies.

All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

More Room At Jasper Lodge

Increased Accommodation Provided For Mountain Hotel

So great has been the demand for accommodation at Jasper Park Lodge, the Canadian National Railways' summer hotel in the Rocky Mountains, that increased accommodation has been found necessary in order to care for the number of guests desiring to visit Jasper National Park, which is Canada's largest mountain park and game sanctuary, it was stated today by A. S. McLean, general superintendent of Canadian National hotels. To provide for the demand for further accommodation, eight new buildings are now in course of erection, the contract for these having been awarded to H. G. MacDonald and Co., of Edmonton, who now have a gang of men at work.

Last year a separate house-keeping cabin for the use of parties desiring to visit Jasper Park accompanied by their families, and taking with them their own staff of servants, was erected, and this was found so popular that another house-keeping cabin, similar to the first, is being erected. In addition, there will be twelve four room bungalow cabins, each room having private bath and with two sitting-rooms in each cabin. These are also being erected for the 1929 season, three, 10-room cabins, each room having private bath and each cabin having a sitting-room. The new cabins are of log and native boulder construction, in harmony with the other buildings at Jasper Park Lodge. Apart from the sanitary hygienic aspect of the matter. The whole population of the county is thus submitted to constant supervision on the part of the staff.

"In the counties where health units have been in operation for a period of two or three years, the general death rate has been reduced, and especially the infant mortality rate and the death rate from contagious and infectious diseases, with also a marked reduction in the number of cases."

How one community saved a $6,000 hospital bill is told by H. E. Young, M.D., LL.D, Provincial Health Officer, British Columbia.

"In the days previous to the opening of our first medical unit, the district in which it was situated had paid $6,200.00 to the Isolation Hospital for cases that had been sent into it," he writes.

"The following year, 1928, under exactly the same local conditions but with a full-time medical health officer in charge with a staff of four nurses and a sanitary inspector, we were able to reduce the Isolation Hospital charge to less than $100.000. This was an argument that appealed quickly to the municipal council."

Touching upon the matter of finance, Dr. Young writes: "I would urge the serious consideration of the resolution passed by the Dominion Council of Health, "Resolved that the Dominion Government be respectfully requested to provide for the establishment of 'Full-time Health Units' by the voting of an annual grant of money for the purpose."

"The part-time medical officer of health has been to a large extent a failure," writes Dr. J. W. S. McCullough, C.M.G., D.P.H., Chief Inspector, Department of Health, Ontario. Yet at the present time, fully 90 per cent. of Ontario municipalities have their health in the hands of part-time medical health officers.

"The County Health Unit is bound to come," he adds—the question is how soon?"

To Manufacture Fertilizer

Chemical Fertilizer Factory To Be Established At Saskatoon

Arrangements have been completed for the establishment in Saskatoon of a $750,000 chemical fertilizer factory. It will manufacture chemical fertilizers—phosphoric acid, weed killer, sprays and other heavy chemicals. One of the products will be superphosphate fertilizer and it was stated that the raw phosphate phosphate rock will be secured from the Banff district in Alberta, and from parts of the State of Montana. A growing market for superphosphate in the Prairie Provinces is anticipated because of the value of this fertilizer in wheat growing.

Brady: "How did your automobile accident happen?"

Holmes: "Too many turns."

Brady: "Yes?"

Holmes: "The road turned right, I turned left and the car turned turtle!"

WORLD HAPPENINGS BRIEFLY TOLD

Hon. H. G. Carroll, vice-president of the Quebec Liquor Commission, received official notification that he had been named lieutenant-governor of the province of Quebec.

R. B. Graham, Crowsnest prosecutor in the Winnipeg police court since 1913, has been appointed police magistrate in succession to Sir Hugh John Macdonald, resigned.

Pending the world-wide abolition of slavery and forced labor, victims of the two institutions should at least enjoy the advantages of the eight-hour day, according to the International Labor Bureau at Geneva.

Clad in bright crowns, knickers and high boots, with pack sacks slung across their backs, Hilda Beaton and Barbara Thorning, two English girls, have set out from Toronto on the first leg of a journey to Vancouver, B.C.

Negotiating a distance equal to that around the world at the equator, 25,000 miles, a motor cycle which carried eight British drivers in relays for 33 days and 22 nights covered the entire distance, 25,190 miles, in 554 hours 8 minutes.

The Manitoba Department of Education has agreed to form a circulating library of professional books for school teachers. By paying the postage on books all teachers in the province will be able to secure this aid in their profession.

Miss Ellen Hemmeon, B.S., of Mount Allison University, Sackville, N.B., won the travelling scholarship awarded annually by the Canadian Federation of University Women for 1920-30. Miss Hemmeon is dean of women, and instructor in the department of French, at Mount Allison.

E. W. Beatty, president of the Canadian Pacific Railways, stated that the Duke of Gloucester, third son of the King, would open the new railway hotel being completed in Toronto, provided he could be in Toronto at that time. The Duke of Gloucester will arrive at Vancouver in June to start a tour.

Stone Damaged By Germs

Will Make Erosion On Hardest Marble In Three Weeks

At the Building Research Station, at Garston, near Watford, England, experiments are continually being made to ascertain the effects germs have on the different kinds of stone. A piece of stone is selected and all its chemical parts submitted to examination. Every precaution that the chemicals is examined, and just as they look for the germ which is preying on and causing damage to the human body, so they seek the germ which is preying on what appears to be an inanimate slab of stone, says Tit-Bits.

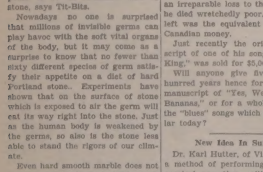
Nowadays no one is surprised that millions of invisible germs can play havoc with the soft vital organs of the body, but it may come as a surprise to know that no fewer than sixty different species of germ satisfy their appetite on a diet of hard Portland stone. Experiments have shown that on the surface of stone which is exposed to air the germ will eat its way right into the stone. Just as the human body is weakened by the germs, so also is the stone less able to stand the rigors of our climate.

Even hard smooth marble does not come under these bacteria, and, incredible as it may seem, experiments reveal that they will make an erosion o nthe hardest marble in three weeks.

More than 844,000 of England's citizens received poor relief in September of 1928.

For Influenza

The Liniment That Relieves All Ailments



New Theory Would Revolutionize Lighting

Professor Thinks Artificial Fireflies May Replace Lamps

Artificial fireflies as big as peacocks to be used in libraries or living rooms in place of electric lamps were suggested by an address in New York on "Living Lamps" before the American Institute in Cooper Union by Dr. E. Newton Harvey, professor of zoology at Princeton University.

Prof. Harvey thinks the time will come when our lamps will live and be quite independent of wires or electric meters with their attendant monthly bills. The lamps he foresees would live and would incidentally be immune from recruiting themselves from their ashes like the Phoenix of old.

And whereas the firefly of nature only flashes, burning up the tiny amount of "oil" in its lamp and then staying dark again until it has replenished it, the robot fireflies would be so contrived as to give a continuous glow, reforming a part of its "oil," which is technically called "luciferin," while it was burning the rest, this being an incessant process.

"Chemically," said Prof. Harvey, "luciferin is probably to be placed among the simplest members of the proteins, the peptones or proteoses, and the question as to whether we shall ever be able to reproduce living light becomes the question whether we shall ever be able to synthesize the proteins. Personally, I think that will come in the future. We now synthesize fats, sugars and some of the polypeptids, which are simple proteins.

"It is only a matter of time for synthesis of the more complicated compounds of which luciferin is a member."

Prof. Harvey, who has made a study of all those animals which are endowed with luminescence, employed as searchlights, as lures and as love attractions, has also spent forty groups of the animal kingdom and two groups of plants to be luminous.

World's Greatest Song Writer

Schubert Thought Music As Easily As People Think Conversation

A few months ago the centenary of Franz Peter Schubert's death was celebrated all over the world, because he was the greatest song writer who ever lived.

He composed six hundred songs, thirty operas, six masses, several symphonies, and innumerable works for piano and string instruments, many of which are almost unknown, but they will live for ever. This he did simply because his brain thought music as simply as ordinary people's brains think of ordinary conversation.

He died when in his early thirties, an irreparable loss to the world, and he died wretchedly poor. All that he left was the equivalent of $12.50 in Canadian money.

Just recently the original manuscript of one of his songs, "The Erl King," was sold for $5,000.

Will anyone give five cents one hundred years hence for the original manuscript of "Yes, We Have No Bananas," or for a whole carload of the "blues" songs which are so popular today?

New Idea In Surgery

Dr. Karl Hutter, of Vienna, reveals a method of performing a bloodless surgical operation with a needle shaped electrode, which coagulates and removes diseased tissue without the use of a knife. It has been used so far to remove warts, birthmarks, moles, and the like, but can be used for more serious operations, Hutter said.

Limestone In Canada

Every province in Canada except Prince Edward Island contains workable deposits of good quality limestone. In the case of Saskatchewan, the limestone is inaccessible at present and it is not worked. Ontario is the principal producer.

Gold threads are made so fine in India that 1,100 yards weigh only an ounce.

Cat's-eye is a kind of quartz, much valued as a gem, opalescent, and of various shades.

W. N. U. 1780

Fish and Game Association

Worthy Object That Should Have the Support Of People Of Canada

Fish and Game Associations and governments in every province of Canada and Dominion Government officials have swung in behind the movement to establish a Dominion Fish and Game Association. A partial list of the objectives of this association is as follows:

To save wild life from extinction in Canada.

To encourage the enactment of wise regulations by Dominion and by Provinces to this end.

Note.—By wild life is meant not only the game birds, game animals and game fish, but all other useful birds, animals and fish.

To increase Canada's wild life resources by means of preservation and by stocking.

To introduce new species of game birds, game animals and game fish that will thrive in Canada.

To spread knowledge of Canada's wild life and its value as a national resource, through the Dominion and Provincial Governments, through the Dominion and Provincial Fish and Game associations, through the schools and colleges, through the press, through the committee chairmen and through all other reasonable and available agencies.

To encourage the establishing of fish and game sanctuaries, both federal and provincial.

To co-operate with the United States in respect of stocking and protecting waters that are common to both countries.

To assure the exchange of information between the provinces in regard to wild life conditions and with regard to the results of stocking, protection and conservation efforts.

To encourage the exchange of fish and game birds and animals between provinces for their mutual benefit.

To conserve the forests and to prevent forest fires.

To safeguard the wild life of Canada primarily for the benefit of the people of the Dominion.

To discourage the use of public domain or streams for private and selfish purposes.

To urge the establishing of game fish hatcheries on an adequate scale in each province.

Swiss Farmers' Scheme To Liquidate Debts

Are Asking Their Federal Government To Adopt "Dawes Plan"

Swiss farmers, who seem to have the same tendency as American ones for being overwhelmed with mortgages and debts, have just applied to the Swiss Federal Government for a "Dawes Plan" in their behalf.

The agriculturists say they have no objection whatever to American farmers adopting it, provided they can put it over on Washington.

Meanwhile the Swiss Government has no authority for paying off the debts of its private citizens, but to spread through the project of the Swiss farmers merely provides that it create a special fund in their behalf by appropriating $100,000 annually. At the end of thirteen years when this fund will total $1,300,000 the appropriations will cease.

It will then be the authorities in charge of the fund will undertake settlement of the debts and all mortgages of small farmers who go to it.

First of all the administrators of the fund in each case will undertake the examination of the mortgages and debts of each farmer, preference being given in every instance to the claims of the oldest creditors.

When the debt on each farm has been consolidated, payment will be made from the fund created by the state at the rate of 10 per cent. annually, of which 4½ per cent. will be for interest and the remainder for a sinking fund for the payment of the debt itself. Under this system the entire debt will be liquidated in ten years.

The only weakness that might appear in the plan to the eyes of a financier would be that no especial provisions are made for the farmer to pay back the state for having liquidated his debts.

Once, however, the farmer takes advantage of the state's "Dawes Plan" to get him out of debt he no longer has the right to either dispose of his farm or to incur fresh debts on it as a security. He can, however, pay off the complete indebtedness at any time he may wish or may be able to do so and thus come back into full control of the farm or the lowering of fresh mortgages and debts, if he so desires.

Had Good Appetite

Ralph Steele, farm hand, living near Chippewa Falls, Wis., after eating 27 pancakes in a "flapjack" eating contest, was still hungry. He decided to have a little dessert, consisting of nine sausages, a piece of cheese, a slice of pie and a cup of coffee.

Alberta Wheat Pool Elevators

Fifty-six elevators will be built at as many different points by the Alberta Wheat Pool this year. This will bring its total up to 374 elevators.

Empire Marketing Board

Spending Money To Create An Interest In Canadian Farm Products

A bulletin from the Saskatchewan Department of Agriculture draws attention to the fact that Canada is spending money liberally to create an interests in Canadian farm products in the British Isles, and that the Empire Marketing Board, in its turn, is educating the people of the British Isles to purchase Canadian farm products.

It points out that the British Empire holds unrecalled opportunities to develop markets within her own borders, and urges the farmers of the West to take advantage of the opportunities thus created to establish a market which will be permanent in character and ultimately more profitable.

Pheasants For Alberta

An additional 2,000 Chinese ringnecked pheasants, 600 Mongolian pheasants and 300 pheasants eggs for hatching will be brought into Alberta this year by the Calgary and Game Protective Association and released in selected districts south and southwest of Calgary. In the last few years a few thousands of different varieties of pheasants have been imported and released by the Association and the birds have thrived and flourished to a point beyond themost sanguine expectations.

A London chemist has been trying the effect 'of a new tonic on a mouse. He was more than satisfied, he understand, when the little creature put its tongue out at the cat.

No. 238—Furisian Simplicity. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3¼ yards of 40-inch material with ¾ yard of 36-inch contrasting.

No. 190—One-Piece Wrap Around. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 2⅞ yards of 40-inch material with 4½ yards of braid.

No. 328—New Feminine Elegance. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 4 yards of 40-inch material with ⅝ yard of 36-inch lace and ⅝ yard of 36-inch contrasting.

No. 254—Tailored Lines. This style is designed in sizes 4, 6, 8 and 10 years. Size 8 requires 2 yards of 40-inch material with ½ yard of 36-inch contrasting. Emb. No. 11012 (blue) 25 cents extra.

No. 312—Bloused Dress. This style is designed in sizes 2, 4 and 6 years. Size 4 requires 1 yards of 40-inch material with ⅝ yard of 36-inch contrasting.

Emb. No. 11012—Block Letter Monograms. Given in three sizes, from which any three-letter monogram may be made. Three sets of monograms one inch high; two sets, two inches high, and one set, three inches high (blue).

We suggest that when you send for the pattern you enclose 15 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cut designs for kiddies.

All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Mild Weather Thaws Igloos

Eskimoes Are Made Homeless By Action Of the Sun

It might be expected that winter would be winter at Tavane Bay. For Tavane Bay is 200 miles north of Fort Churchill, where the Hudson Bay Railway, through Manitoba's rich northern mineral fields, will end. But the North has been much maligned. Even the Eskimoes will tell you that. As usual, this past winter, the Eskimoes of Tavane Bay built their igloos, their little round houses of snow and ice. As usual they were buried now and again by blizzards. But quite out of the usual was the thaw which struck them just after Christmas. The temperature soared to 21 degrees above zero. The walls of the igloos collapsed, and dozens of families were made homeless. Yet the Eskimoes were cheerful. Their attitude was: "Who and our country was frozen up?" And building materials were cheap. As soon as the weather was normal again, they set to work and rebuilt.

Vancouver Grain Port

Going Ahead With Port Development On a Big Scale

Vancouver is experiencing a movement of grain comparable to that of the rush season. Storage on March 15th was 5,210,193 bushels in Vancouver elevators, with 534 Canadian Pacific cars on spurs, and 663 cars west of Field. There were 15 boats in port with a united capacity of 2,500,000. Lake head storage was 73,479,000 bushels in elevators with an additional 8,655,000 in boats for winter storage.

Preparing for continued growth of the westward flow of grain from the Prairie Provinces, Vancouver is going ahead with port development on a big scale.

Zepp Making More Trips

The Graf Zeppelin, which made a round trip flight across the Atlantic last fall, will make a second westward flight to the United States in May, a third in June and a fourth later in the summer, it is announced by F. W. Von Meister, recently appointed special American representative of the Luftschiffbau Zeppelin Company, of Friedrichshafen, Germany.

Young women in Japan are rapidly taking the place of men as elevator operators, as well as in many other positions connected with business and industrial advancement.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. it is pleasant, efficient, and harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

HEZEKIAH LEADS HIS PEOPLE BACK TO GOD

Golden Text: "Jehovah your God is gracious and merciful." 2 Chronicles 30.9

Lesson: 2 Chronicles 30.1-27.

Devotional Reading: Psalm 145. 8-17.

Explanations and Comments

Ritual Was Made For Man and Not For Ritual, verses 1-4. Nisan, the first month of the Jewish year, corresponding to our month of April, was the regular time for keeping the Passover. In the reign of Hezekiah, however, the Passover could not be kept at that time, because a sufficient number of the priests had not sanctified themselves (had not undergone certain washings, abstinence and forms), so that a decision was made to keep the Passover in the second month, and this decision applied to the king and the whole assembly.

Dr. Charles Reynolds Brown comments Hezekiah's broad-mindedness in connection with the narrow scruples of the priests and Pharisees of those days, who were intent upon putting Christ to death upon the cross at another Passover, and who would not venture into Pilate's judgment hall lest their feet first should suffer defilement and make them unfit to share in the sacred feast. "No one is entitled to speak with greater authority on the limitations of ritual than a strong advocate of the sanctity of ritual like the Chronicler; and we may well note, as one of the most characteristic marks of his inspiration, the sanctified common sense shown in the frank and sympathetic record of irregularities of Hezekiah's Passover. It says much for the healthy tone of the temple community in his day that he does not attempt to reconcile the practice of Hezekiah with the law of Moses by any fantastic quibbles."—W. H. Bennett.

"Everything regarding form is elastic in the interests of the soul."—W. L. Watkinson.

May Use Submarine

Wilkins Plans Voyage Across Pole But Idea Is Not New

Captain Sir Hubert Wilkins, Polar explorer, has announced that he was considering a voyage across the North Pole by submarine, possibly this summer or next.

Commander Sloan Danenhower, technical expert of the Simms Oil Submarine Company, who plans to navigate the craft, said the submarine to be used was now being built out at the company's works at Bridgeport, Conn.

Sir Hubert said the idea of a submarine trip across the Arctic Sea had been in the minds of submarine designers and explorers since 1899, when Simms Lake advanced it. Stefanson and Peary both had considered it, he said.

The submarine would be equipped with a special diving lock through which a diver might be sent out to blast the ship free of retaining ice, Danenhower said. It would have bars sloping up from the bow to the conning tower to ease it under unsea iceberg and would carry a large quantity of chemicals to melt ice.

Escalloped Macaroni With Cheese

1½ cupfuls Borden's St. Charles Milk.
3 cupfuls cooked, drained macaroni cut in inch lengths.
1½ cupfuls grated American cheese.
1½ tablespoonfuls flour.
1½ tablespoonfuls butter or butter substitute.
½ teaspoonful salt, scant.
¼ teaspoonful pepper.
Few grains paprika.

Make a white sauce of the flour, butter, seasonings and the milk unthickened. Stir in the macaroni, thoroughly oil a rather shallow baking dish, put in a layer of the macaroni, then one of the cheese, continuing in this way until all is used and making the last layer one of cheese. Bake in a moderate oven until browned, about thirty-five minutes.

Princess Alexy has been elected president of the Yorkshire Beekeepers' Association, stated to be the largest society of the kind in the world.

Predicts Next War Will Be Sudden

English Professor Says Britain Could Not Wait To Consult Dominions

Great Britain will either lose the next war or lose the Dominions, Brigadier-General J. H. Morgan, K.C., professor of constitutional law at the University of London, said in a lecture at the university.

The next war, he said, might come like a thief in the night and might be fought and won in the course of three weeks. There probably would be no ultimatum in the case of the conflict. No British government, he continued, would be likely to dare to define what was a flagrant violation of right necessitating immediate action without consulting the Dominions.

While the jurists were trying to decide whether there was or was not a violation of rights and while the parliaments of the Dominions were being consulted the war would be fought and won, the lecturer declared. The result, he said, would be that if Great Britain stopped to consult the Dominions, she would lose the war, and if she did not consult them, she would lose the Dominions.

Brigadier-General Morgan has had a distinguished military as well as a brilliant academic career.

Compulsory Insurance

Privately owned automobiles will be exempt from compulsory insurance for one year at least in the province of Alberta according to a redraft of the Vehicles and Highway Traffic Act recently distributed to members of the Legislature. Taxicabs and livery cars of all descriptions will be compelled to carry a specific amount of insurance.

Very slow plumber: "Oh, I remember your little boy, mum, 'E were in the infants' class when I went to do me first job, and 'e's in the big 'ouse now."

Exasperated Lady: "Indeed. And what class was he in when you'd finished?"

Calgary's Aero Club

Calgary's Aero Club now has 814 members, of which 145 are taking instruction.

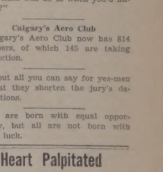
About all you can say for yes-men is that they shorten the jury's deliberations.

All are born with equal opportunity, but all are not born with equal luck.

Heart Palpitated Nerves Bothered Her Sleep Was Broken

Mrs. Fred A. Pugsley, East Southampton, N.S., writes.—"I was bothered very much with my nerves and palpitation of the heart, and my sleep was broken at night.

I decided to try



and after I had taken six boxes I found that they had done me so much good I will gladly recommend them to all those who are troubled with sleeplessness caused by their heart and nerves."

Bible Three Centuries Old

Was Used To Swear In New Vice-President Of United States

A Bible three centuries old was used to swear in the new Vice-President of the United States, Chas. Curtis, of Kansas, on to the property of R. M. Geis, of Salina, Kansas, and is 350 years old. The Bible has been in the Geis family at least five generations. It was printed in Cologne, Germany, in 1564, and was copyrighted by Emperor Ferdinand. It is bound in calf skin with wooden inner covers. The book is printed in two tones, red and black, in clear faced type, and contains many woodcut illustrations. One scene shows an angel driving the devil out of Paradise. Satan is shown as a large horned dragon. On the frontispiece, which bears the German imperial seal, are depicted a series of scenes, the first being the medieval artist's conception of the fall of man. Eve is shown handing Adam an apple. The second is of an angel driving the two out of the Garden of Eden.

Firestone

HAS ALWAYS LED IN SAFETY

The first non-skid tread ever put on a tire was on a Firestone. From that day to this Firestone has been first in safety. No tire can come close to the rugged long-wearing Gum-Dipped Tires. Their famous non-skid tread has more gripping edges than any tread on the road. Every year car the wonderful protection of new Firestone Gum-Dipped Tires today. They hold all world records for endurance, safety, economy. That's why they deliver most miles per dollar.

CHAPTER XVII.—Continued

Donald turned to Wainwright. "Are you going to let me run? Is it safe for her to enter a race with all these men?"

"I couldn't stop her now, and besides," he added with a touch of pride, "she can hold her own with any of them."

The tall trapper made his way to Donald's side. His leathery old face, with its multitudinous wrinkles, wore a puzzled expression. That Delia Lafonte is sultan. He's full of dirty tricks; talat *safe* for Connie to ride."

Donald turned anxiously to Wainwright.

Connie's father shook his head. "I am afraid it is too late now." Then in a heavy voice he added: "You must know the reason for her entering this race."

Donald looked puzzled for a instant. Suddenly it dawned on him. "The purse?"

Wainwright nodded. "It would break her heart if I forbade her to ride, now that she has gone this far. She must have decided suddenly, as she never mentioned it to me."

The Rennie Company had put up a purse of two hundred and fifty dollars. There was also a collection taken after the race to add to this purse.

The horses trotted down the course, Connie rearing and prancing, and it was with difficulty that she managed to get him to join the others. She used forward to whisper words of quieting in the twitching ears. Down the course they came. They were in nice alignment as they passed the judges' stand.

"Go!"

Connie on her spotted cayuse showed a bright splash of colour in the midst of her darker competitors.

Lafonte's dark face lighted with a savage glee as he saw his horse to the inside or "pole."

Running neck and neck with him was his old enemy, Jack Gillis. Leaning low on his horse's neck and shouting unintelligibly in Chinook, Connie was with the stragglers before lengthis the race. This was new to Pegasus, and he was bewildered by the crowding horses about him. As they turned the corner of the course, Lafonte's horse stumbled, and before he righted Paul John had slipped into the lead. Cursing wildly, Lafonte set the lash in his horse's head at the flank of his rival.

Hundreds of times Pegasus had traveled this field with Connie clinging to his back, slowing up for shrubs and trees and making sudden bursts of speed in the open. That had been vastly different to being surrounded by running horses and listening to the wild cries of their riders and the roaring of the excited crowd.

At the moment Lafonte lost the point of vantage to his rival, Connie leaned forward and emitted a peculiar clucking sound at the same time striking her moccasined feet into the horse's sides. Pegasus's ears twitched back and forward at the voice he loved. "Now I know what you want," he seemed to say, as his beautiful neck stretched out and his hoofs spurned the ground. His graceful body lowered until it appeared to the spectators as though he were just skimming the earth. He moved with a springy stride, the muscles of his sinewy frame working with a rolling movement beneath the glossy skin. Gradually he drew away from the horses travelling with him. Foot by foot he crawled upon the leaders.

The position of the judges' stand came to their feet to shout approval. The girls were cheering wildly for Connie as she crept nearer the leaders.

Donald was leaning forward with flushed face, his eyes glued to the spot. Connie, a deep question in his heart for the intrepid little rider.

Little Andy jumped on the rail. "Strike me pink!" he yelled, "look at that 'oss! Look at the eyes on 'im!" with excitement. "A 'undred dollars on the spotted 'oss!" he shouted hysterically.

"I'll take you," said a voice.

"Ere you are, mate; let's make it two 'undred. Now for me 'oss girl. She saved me blinkin' life, God bless 'er!"

As they neared one of the corduroy roads

GOODYEAR SUPERTWIST TIRES

The highest grade cord fabric (other than Supertwist) used in the manufacture of tires has a stretch somewhere from 16% to 18%.

Supertwist Cord will stretch from 26% to 30% of its own length before it gives way and breaks, in other words, it possesses more elasticity, will absorb more flexing, will stretch and come back more times and stand more road shocks than any other type of cord material.

Supertwist Cord is an exclusive Goodyear production.

Insist on getting Goodyear Supertwist Cord Tires.

POWER OF THE PRESS

The power of the press cannot be measured in physical units nor in lineal dimensions, and yet there has never been a time in the history of the fourth estate that this power has not been exerted with impressive force on society and with society conscious of that effect.

This omnipotency seems to have been inherent in the institution itself, for it was during the incipiency of the press in America, at a time when there were scarcely a half-dozen newspapers in the New World, that the battle for freedom of the press was won quickly and decisively. Attempts have been made since to muzzle the press, but without success. The power of the press is readily explained by the fact that with rare exceptions the press represents the will of the people.

Without the co-operation of the press it has been said that the United States could not have organized its resources for the successful execution of the world war.

Persons concerned with the rigid enforcement of the prohibition laws are quick to say that it is only because a majority of the newspapers of the country favor prohibition and its enforcement, that those commissioned with such enforcement are seldom derelict to their duty. In spite of propaganda to the contrary, there are no other laws in the United States so vigorously enforced by public officials as those against alcoholic beverages. And the power of the press is responsible—even more so than public opinion.

Procrastination is the thief of time and also of eternity.

Many a husband is willing to accept advice from almost any women except his wife.

Local and District

A Gibb, of Munson, was a visitor in Delia on Monday.

* * *

Arthur Williams, of Toronto, was a business visitor here on Monday.

* * *

Wm. Gibson, local Ford agent, received another carload of new Ford cars this week.

* * *

Miss Ada Lees, of the Farmers Store, has been on the sick list during the past fortnight.

* * *

Mrs Jas. Dunlop and children, of Cranbrook, B. C., are the guests of Mr and Mrs W. B. Dunlop

* * *

Miss Brenda Rowe, who is attending Normal School in Calgary, spent the Easter holidays at her home here.

* * *

The U.F.W.A. are putting on an ice cream social in the Rest Room on Saturday afternoon, April 20th —Adv.

* * *

Perley Coursier arrived home the latter part of last week, after spending the winter at his old home in the east.

* * *

Reginal and Loftus Tillotson have returned to the Tee and C. C. I. after spending the last ten days with their parents, Mr. and Mrs. E. R. Tillotson.

* * *

There will be a meeting of the U.F.W.A. at the home of Mrs. Hewson on Thursday afternoon, April 25th, at 2.30. Everyone is cordially invited.

* * *

Mr. and Mrs. Duncan Reid, who are now residing in Calgary, having bought a house there, are visiting their son and daughter-in-law, Mr. and Mrs. Emerson Reid.

* * *

The Craigmyle U.F.W.A called recently at the home of Mr. and Mrs. E. R. Tillotson, and gave a shower to their little son (Yosel Rousie), who received a number of lovely presents.

* * *

We had a return of winter the latter part of last week. On Friday it blew a blizzard, with a cold north wind. There has been hard frosts, but indications are for more moderate weather. Farmers are marking time to commence seeding.

* * *

Charlie Sweeney left on Sunday morning's train for Calgary, en route to Minneapolis and St. Paul, and his former home in the U.S.A. He will afterwards visit relatives in Spokane, Wash., and other western States.

* * *

The W.A of the Church of England will hold a tea and sale of home cooking in Mr. Grant's old store, on Saturday, April 13, starting at 3 o'clock. Donations of cooking will be gratefully appreciated.—Advt.

* * *

Our readers will be interested in hearing that our local weed inspector, Mr. J. R. Boon, was successful in winning a diploma at the recent examination put on for weed inspectors at the Edmonton University, by the Department of Agriculture.

* * *

Miss Mary Morrison, who is attending Normal School in Calgary, spent the Easter holidays with her parents. She will now be teaching for a week at Hillview School, in company with Miss Cook, the teacher, before returning to her studies.

* * *

Alex R. McTavish R O., Sight Specialist, Drumheller, will be at the Kennedy Drug Store, Monday, April 15th. Eyes tested, glasses fitted. Complete sight testing equipment. Prices reasonable. Craigmyle Hotel Tuesday, April 16th.—Advt.

* * *

The U.F.W.A. and Ladies' Aid have decided, that if the community dishes are to be kept in respectable repair, it will be necessary to charge a fee of $1.00 for all organizations or individuals removing the dishes from the church: said fee to be paid Mrs. Hamilton on receipt of the key to the cupboard.—Advt.

* * *

With respect to children who have been unable to attend the Delia United Sunday School regularly during the first three months of this year, the parents are requested to furnish a letter to the superintendent, specifying reasons for non-attendance. This information must be received on or before Sunday, April 14th, in order that the attendance badges can be awarded.

At a meeting of the Delia U.F.W.A on Saturday afternoon, it was decided that the regular meeting day should be the last Thursday afternoon of each month, at 3 p.m. All women interested are cordially invited to attend these meetings.

* * *

"Fight the good fight of faith, lay hold on eternal life, where unto thou art also called, and hast professed a good profession before many witnesses" 1 Tim 6 12 But you have never put up any fight at all. You have laid down on your back and let the devil trample on you. Stand up for Jesus Christ and be a man.

"Liberty," and Ford!

The following is an extract taken from the April 8th., 1929, issue of "Liberty" published in New York City, U. S. A. The Liberty Corporation ran a special ad. in their own weekly, concerning the phenomenal advances of their periodical to the far greater advance of the New Ford Car. The title of the advertisement was "CARS OTHER THAN FORDS".

"Statistical reports coming to our desk are still using that absolute ay pronoun, "Cars other than Ford". Time was when the phrase possessed a certain potency.

"Times have changed.

"Cars other than Fords, as indicating a distinction between much money in the bank is dead—cold dead. Ford himself killed it. Almost overnight, the old Ford became a memory.

"The new Ford flashes down the drive ordered to suit the most exacting of modernists. The new Ford, gem mounted, leaps from the leash of the spotlight at full power, while multi-cylindered aristocrats of the avenue are picking up the pace in second. The new Ford, town-car model, parks proudly before the swankiest hotel on Fifth avenue, Michigan Boulevard, Hollywood Boulevard. The chauffeur (in livery, mind you!) waits with no sense of dignity at the wheel. Madame is inside Shopping.

"Liberty's audience of readers is vast in numbers, in prosperous, modern mindedness. Liberty renders more about. They go places and do things. Naturally they need cars. They buy snazzy sedans and ritzy roadsters. They have bought, and are buying the new Fords in great numbers. Price still functions as a factor. But pride of ownership, something hitherto held sacred to the elite Auto How, has entered into the Ford equation. Things have happened in the motor world, and they are happening all about us.

"So, we repeat, the phrase heading this advertisement is outmoded. Grisly, but firmly, we pick it up, carry it to the rail and kick it overboard. And may there be no mourning of the car!"

HAND HILLS ECHOES

Mr. O. B. Richardson returned home a few days ago from Moskow, Idaho, where he spent the winter.

Miss Helen Courtney is spending her Easter holidays with her parents arriving from Calgary about ten days ago.

A real good time was spent at the dance at Blair School, on April 3rd. On Friday, April 5th, a farewell party was given at Cotter School in honor of Miss Hilda Smith, who is leaving shortly for England. We wish Miss Hilda lots of luck in the old land.

Mr. and Mrs. A. Anderson, and Mr. and Mrs. F. L. McFadden, were Drumheller visitors a few days ago.

After spending several months at the coast, Mr. and Mrs. S. A. Peterson have arrived home again.

University Feeders' Day Popular

A large attendance of farmers and stockmen is expected at the eighth annual Feeders' Day to be held at the university of Alberta farm on Saturday, April 13th. On this occasion the experimental and research work with beef cattle, sheep and swine, which has been carried on by the Department of Animal Husbandry will be reviewed and the results of the various trials made available to any who are interested

Alberta Flier Wins Dominion Trophy

The McKee trophy awarded for the most meritorious flying done in Canada in 1928 has been won by Lieutenant C. H. Dickens of Edmonton. Special mention is made in awarding this honor to Lieut. Dickens, of his flight of 3,964 miles across the Barren Lands last September. During the past month while on a flight to Fort Good Hope he crossed the Arctic Circle and has since returned to Edmonton from where he is engaged in making regular flights into the far north.

Man's glory is the cross, other Wise it becomes his stumbling block.

Dated at Munson, Alberta, this 29th day of March, A. D. 1929.

14 15a W. S. TURNER, Secretary-Treasurer.

Prairie Fire Prevention

The following is an extract from The Prairie Fires' Act:—

"Nothing herein contained shall prevent any person from kindling fire before the seventh day of May in any year for the purpose of clearing any area of land not exceeding three hundred and twenty acres, if such land is completely surrounded by a fire guard not less than ten feet in width consisting of land cleared with snow, water or being so worn, grazed, ploughed, burned over or covered with water as to be free from inflammable matter.

"Any person so kindling a fire shall cause it to be guarded during the whole period of its continuance by three adult persons provided with proper appliances for extinguishing prairie fire, and should such fire be left without being so guarded or be allowed to escape such person shall be guilty of an offence and liable on summary conviction thereof to a penalty not exceeding one hundred dollars."

Owing to baled crops and the increased use of combines there is a lot of long stubble in the district, and the Council hereby requests the residents of Lambton Municipal District, No. 306, to strictly abide by the aforesaid provisions of The Prairie Fires' Act when burning their stubble.

Council of Municipal District of
14-15a **Lambton, No. 306.**

New Mining Company Being Incorporated

A company is being incorporated by H. H. Adams, of Adams, Fitch and Arnold, as solicitor for a group of business men who see possibilities in supplying coal to the Ontario markets. The company will be incorporated by Dominion charter under the name of The Willow Creek Development Company, Limited, having a capital of 750,000 shares of common stock with no par value. The head office will be at Calgary.

The company intends to open a mine on section 23, twp. 28, rge. 18, west of the 4th meridian, in the new Willow Creek coal fields. This will necessitate the building of a spur line connecting with the joint C.P.R. and C.N.R. railway, at the mouth of Willow Creek, approximately six miles northeast to the junction of Willow Creek, Deadman and Rose coulees.

The mining rights were acquired from the Willow Creek Holding Company, Limited, which controls approximately 10,000 acres of coal land in the district, whose intentions are to furnish mining companies with coal lands on a royalty basis. Engineers report that the land contains 12,000 tons of extractable coal to the acre.

It is stated that Messrs. A. Munroe and O. Rowden, of Hanna, intend to open a "wagon" mine on this property within the next few months.

New School Inspector Appointed

R. J. Scott, Principal of McKay Avenue School, Edmonton, has been appointed Inspector of Schools for the Open Inspectorate, succeeding the late F. L. Aylesworth whose death occurred recently. Mr Scott has occupied his recent position for the past ten years, has had twenty-one years teaching experience, and is well qualified for the new duties he will take up.

To every bird its own nest is charming.

THE GOOD BOOK

A New York periodical has received communication from a reader in which he sets forth that after many months of industrious study of the Bible he has discovered that it contains 3,566,480 letters, 810,697 words, 31,175 verses, that the name of God appears 46,627 times, that the twenty-first verse of the seventh chapter of Ezra contains all the letters of the alphabet, and presents much other curious information concerning the Scriptures.

These facts are of little importance in themselves, but they are interesting as a revelation of the strong hold the Bible has on the affections of the people. Counting the letters in the Book was manifestly a labor of love on the part of the compiler It is impossible to conceive of any other volume of like size exercising so powerful a fascination that anyone would want to count the letters.

And it should be borne in mind in considering the subject that while no one, perhaps, ever made a compilation of this sort before, thousand have studied the Bible just as painstakingly in other ways. There are well authenticated cases of men who have committed the whole of the New Testament to memory. John Muir, the naturalist not only learned the New Testament by heart but the Old in addition.

It is not strange that a book which is so greatly loved should continue, thousands of years after it was first written, to be the best seller.

A friend is another self.
